Having about 6.5+ years of experience as Software Developer with Web based application, Database technologies, System analysis, Design and Development. Software Development Life Cycle (SDLC) experience including Requirement, Specification, Analysis/Design, Development and Unit Testing as per the Agile process. Develop web and mobile applications by producing clean, efficient code with helping Visual studio code using Python(Django, FastAPI, Flask), JavaScript, Typescript, HTML,CSS, Bootstrap, MongoDB and MySQL. Responsible for Creating API for Web and Mobile Application. Responsible for Creation/Implementations /Integrations/Maintenance of web services and API for Mobile device platforms like Android / iOS using JSON/XML. Review and debug code, implement quick fix if required. CI/CD pipeline, JWT Experience. Taking care of Deployments on Server (WAMP/Local/Remote). Implement Application security/validation/verification testing / OWASP. Knowledge of GIT, AWS, Bitbucket cloud Technology Protect operations and data by keeping information confidential. Work collaboratively with others to achieve goals. Ability to work on multiple projects.

INDUSTRIES: Software and Platforms

TECHNICAL SKILLS

• Python	6 years
• database management system	5 years
• API Development	5 years
• Java Script	3 years & 5 months
• Cloud Platforms	3 years
• AI ML Frameworks	2 years & 5 months
• React	2 years
• Docker	2 years
• Automation	1 years & 5 months
• Kubernetes	1 years
• CI CD Pipeline	1 years

SOFT SKILLS

Time management, Critical thinking

PROJECT DETAILS

• Online Plumber

Project Description: Online Plumber is a technology platform offering online plumber services at home. Customers use our platform to book plumbing services Tap Leakage, Shower Leakage, Sink Repairing, Wash Bashing, New Bathroom etc Quick & Simple Registration for User Plumber Generate Lead for Plumber OR Plumbing Material Requirement Auto Assign the user lead to register plumber Submit Feedback and rating by user Natural & User Friendly Interface View Plumber Profile And Details Real Time Data Notification Control From The Back End

Responsibilities: Develop, test, and implement modules as per requirement Facilitate root cause analysis of system issues Design and update database architecture Possess strong problem solving and decision-making skills while using good judgment Multi task and change from one task to another without loss of efficiency Taking care of Deployments on Server Independently install and integrate packages on server

Technologies: Python, Django, MongoDB, Firebase

Industry: Software and Platforms

• Shopping Engine

Project Description: E Shopping Search Platform is the place where online shopping marketplaces come in mind. It isnt an online marketplace but it is more of Free Product Ads platform, it gives consumers buyers the same opportunity to browse a variety of different products based on their search criteria. It benefits store owners and retailers because when a consumers buyers clicks on a product link, they are sent back to the store owner site to purchase the product. Sign Up for Account, Create a feed. Upload product data, Setup store and configure settings

Responsibilities: Develop, test, and implement Modules as per requirement Facilitate root cause analysis of system issues Regularly communicate with client and team via slack, email and skype Identify ideas to improve system performance and impact availability Multi-task and change from one task to another without loss of efficiency Taking care of Deployments on Server

Technologies: Python, Flask, React Js, Typescript, MongoDB

Industry: Software and Platforms

• mPrompto

Project Description: mPrompto is platform for enterprise client. Which help organisation to increase sales with suggestion alternative products.

Responsibilities: Develop, test, and implement AI modules API integration Application by providing clients with tools to monitor and optimize performance Design and update database as per the requirement Resolve complex technical issues

Technologies: Technology Python, Generative AI, TensorFlow, ReactJS, NodeJS

Industry: Software and Platforms

EDUCATION

• Bachelors degree in BCA from GTU 2016 - 2019

LANGUAGES

• English - advanced
