Full Stack Developer with 5 years of hands-on experience in developing and deploying scalable web and enterprise-grade applications. Highly skilled in C#, .NET Core, and MVC frameworks, with strong expertise in SQL Server for performance-driven database design. Experienced in leading full-cycle projects, implementing secure Azure solutions, and managing the entire SDLC. Committed to delivering efficient, reliable, and business-focused software solutions.

INDUSTRIES: FinTech, Security Systems, Fintech, Real Estate, Survey, Hospitality

TECHNICAL SKILLS

• C#	4 years & 7 months
• Oracle	4 years & 7 months
• SQL Server	4 years & 7 months
• ADO.NET	4 years & 7 months
• REST APIs	4 years & 7 months
• Web API	4 years & 5 months
• MVC	4 years & 7 months
• .NET Core	4 years & 7 months
• Asp.Net	4 years & 7 months
• MySQL	4 years & 7 months

SOFT SKILLS

GitHub, GitLab, RPA (UiPath), Manual Testing, Postman

PROJECT DETAILS

• Nippon India MFD — June-2022 - January-2023

Project Description: The Nippon Singapore Informative Website CMS stands as a testament to seamless digital management and engagement, offering Nippon Singapore a sophisticated platform to curate and present their valuable information effortlessly. This comprehensive Content Management System has been meticulously designed and developed to empower Nippon Singapore with the ability to maintain, update, and enrich their online presence with utmost efficiency.
Responsibilities: Developing detailed analysis and design documents Coding and conducting unit-level testing Collecting and validating functional requirements Building and organizing database architecture
Technologies: .NET C#, Web API, Microsoft SQL, React
Industry: FinTech

• Birdi Systems, Inc — October-2021 - January-2022

Project Description: Birdi System, Inc. offers Capital Project Planner, a tool for managing project portfolios. It helps users visualize, calculate, and analyze project phases, aiding managers in budgeting and scheduling.
Responsibilities: Creating detailed design and analysis artifacts Performing coding, debugging, and unit testing Capturing and interpreting project requirements Designing and structuring efficient databases
Technologies: .NET Core C#, Web API, MySQL, React
Industry: Security Systems

• Accompt Fintech Web Application

Project Description: Accompt Fintech Solution: Simplifies asset data entry, tracks portfolio profits/losses, facilitates diverse asset transactions, and offers downloadable reports.
Responsibilities: Preparing analysis and design documentation Writing clean, efficient code and performing unit testing Gathering and understanding client requirements Designing and structuring the database
Technologies: .NET Core C#, Web API, MySQL, React
Industry: Fintech

• Avestor, Inc.

Project Description: Every investor should have the opportunity to invest in real estate and alternative asset classes.
Responsibilities: Documenting system analysis and design Implementing code and executing unit tests Engaging in requirement gathering sessions Designing and maintaining database structure
Technologies: .NET Core C#, Web API, MySQL, React
Industry: Real Estate

• Arabian Research Survey

Project Description: Web-based Survey platform with smart real-time Dashboard Solution. The platform is designed to help capture client experience and inputs in the banking domain.
Responsibilities: Creating system design and analysis documents Writing and testing application modules Gathering, analyzing, and clarifying requirements Structuring and optimizing database schema
Technologies: .NET Core C#, Web API, MySQL, React
Industry: Survey

• Revamp Birdi Systems, Inc.

Project Description: Birdi System, Inc. is a CPP application revamped for ReactJS (Frontend) & .Net as Backend.
Responsibilities: Preparing technical design and analysis documentation Coding, debugging, and performing unit tests Understanding business and technical requirements Planning and structuring relational databases
Technologies: .NET Core C#, Web API, MySQL, React
Industry: Security Systems

• Asset Management CMS

Project Description: NLIAM is a flagship company representing the offshore interests of Nippon Life India AMC.
Responsibilities: Drafting system analysis and design reports Developing and testing application features Gathering requirements from stakeholders Designing scalable database structures
Technologies: .NET Core C#, Web API, MySQL, React
Industry: FinTech

• Ethiopia Hospital Management System

Project Description: Shalom Healthcare Consultancy proposes a Hospital Management System with EMR solutions, healthcare CRM, telehealth, mobile health, AI, analytics, and ecommerce. Built on Open EMR, it aims to automate healthcare operations.
Responsibilities: Producing design and analysis documentation Writing, testing, and reviewing code Identifying and collecting system requirements Structuring and managing database components
Technologies: .NET Core C#, Web API, MySQL, React
Industry: Hospitality

EMPLOYMENT HISTORY

• Full Stack Developer

Description: Full Stack Developer with 5 years of experience in building and deploying scalable web & enterprise applications. Proficient in C#, .NET Core, MVC, and experienced with SQL Server for high-performance database management. Skilled in leading end-to-end projects, architecting secure Azure-based solutions, and driving the full SDLC. Focused on delivering reliable, high-quality, and business-aligned software solutions.

EDUCATION

• Bachelors degree in Bachelor of Science in Information Technology from Jai Hind College — 2017 - 2020

LANGUAGES

• English - advanced
