PROJECT DETAILS

• Finance Management Tool (UBOMI) August-2022 - September-2023

Project Description: The Money Management Application tracks expenses and income through transactions and allows clients to link their real banks. Transactions can be manually uploaded or automatically fetched from the bank. The app provides graphical representation of spending based on categories for users to track their financial performance.

Responsibilities: Requirement gathering and Analysis. Backend Development. Peer code review, Technical Support and Collaboration

Technologies: Core PHP, MySQL, NodeJS, VueJS, Quasar Framework, BitBucket, WHP (PHPMyAdmin, Terminal, CronJobs), AWS

Industry: FinTech

• Bartercard Management System September-2023 - June-2025

Project Description: Bartercard is a digital platform that facilitates barter transactions between businesses. It allows members to trade goods and services without using cash, by using a virtual currency system. The platform includes features for marketplace, listing items, managing transactions, tracking trade balances, and generating reports on trading activity.

Responsibilities: Requirement gathering and Analysis. Creating schema structures to ensure data integrity and efficiency. API Development for Tourism, Stripe (PG integration) & Manage Restrictions, etc. Peer code review, Technical Support and Collaboration.

Technologies: Laravel, MySQL, AWS, Stripe

Industry: FinTech

EMPLOYMENT HISTORY

• Back End Developer August-2022 - July-2025

Description: - Developed and maintained backend architecture for large-scale applications using Laravel and Node.js. - Implemented APIs and AWS services (EC2, S3, SES) with Bitbucket CI/CD pipelines. - Managed Stripe payment gateway integrations. - Automated CronJobs and deployment processes.

EDUCATION

• Bachelors degree in Bsc Computer science from Mumbai University 2011 - 2014

LANGUAGES

• English - advanced
