• Git	1 years & 4 months

PROJECT DETAILS

• Schmidt Science Fellows

Project Description: Worked on Salesforce Education Cloud to automate and simplify the admissions process for Schmidt Science Fellows. The project included building Flows, Apex logic, and Email Templates to manage

Responsibilities: Designed and customized Email Templates for automated communication. Developed Scheduled Apex and Batch Apex for background processing. Built Flows to automate business processes and improve efficiency. Used Custom Metadata Types for flexible and configurable logic. Created and maintained Test Classes to ensure code quality and coverage. Performed deployments using Gearset across sandbox and production environments.

Technologies: Apex,Education Cloud Customization.

Industry: Sales

• University of Liverpool

Project Description: Developed test classes for Apex logic integrated with OmniScripts in Salesforce Industries (Vlocity), ensuring error-free data flow. Achieved high code coverage and maintained deployment readiness with Salesforce best practices. Managed and deployed changes using Gearset with automated pipelines for smooth and reliable releases.

Responsibilities: Developed test classes for Apex logic integrated with OmniScripts in Salesforce Industries (Vlocity), ensuring seamless data flow, API interactions, and robust error handling. Used FlexCards to build a dynamic application form, providing contextual display of data and enhancing user experience. Achieved high code coverage and maintained deployment readiness in line with Salesforce best practices. Managed and deployed changes using Gearset, enabling smooth, automated, and traceable CI/CD workflows. Validated and promoted changes across environments through automated deployment pipelines, reducing manual effort and improving release reliability.

Technologies: Apex Testclasses, Gearset Deployments

Industry: Sales

EDUCATION

• Bachelors degree in B.Tech from Sona College of Technology 2020 - 2024

LANGUAGES

• English - intermediate
