With over 9 years of dedicated experience in software development and implementation, I have garnered expertise across various domains. My proficiency includes developing enterprise applications, multi-tenant systems, and module-based applications. I am a proactive contributor to all phases of the software lifecycle, leading the analysis, design, development, deployment, and testing of medium to large-scale web applications within the enterprise context.

INDUSTRIES: AI powered LCA and EPD software with all the world s data, HealthTech

TECHNICAL SKILLS

• Java	9 years & 8 months
• Agile Scrum methodology	8 years
• Spring Boot	7 years
• Microservices	6 years
• React JS	4 years & 5 months

SOFT SKILLS

Teamwork, Problem-solving, Critical thinking

PROJECT DETAILS

• One-Click LCA

Project Description: One-Click LCA stands as a robust construction platform tailored for contractors. Within this platform, contractors have the ability to generate comprehensive building profiles, closely monitor project progress, track material usage, strategically plan project phases, and crucially, monitor carbon emissions. The platform's pivotal feature involves generating detailed reports on carbon emissions, fostering an environmentally conscious approach. Leveraging project configuration data, the platform also provides actionable recommendations to curtail carbon emissions, effectively contributing to sustainable construction practices
Responsibilities: Working as a Backend developer (JAVA) and add my Java 11, Spring Boot 2.7+, MongoDB, Microservices, AWS, React, Swagger, Git, Maven skills for this project
Technologies: Java 11, Spring Boot 2.7+, MongoDB, Microservices, AWS, React, Swagger, Git, Maven
Industry: AI powered LCA and EPD software with all the world s data

• Equip Health

Project Description: Equip Health is a comprehensive platform that serves both medical professionals and patients, facilitating the creation of profiles, appointment booking, and doctor-patient communication. Additionally, the platform offers a unique feature for registering in predefined group classes. These classes provide participants with the opportunity to engage with like-minded individuals in their respective health communities. This environment fosters knowledge sharing, enabling users to post notes, exchange thoughts, and collectively enhance their understanding of optimal health practices.
Responsibilities: Working as a Backend developer (JAVA) and add my Java 11, Spring Boot 2.7+, Spring WebFlux, Spring Security, Hibernate, PostgreSQL, AWS (Lambda, S3, Secrets Manager), Maven, Git skills for this project
Technologies: Java 11, Spring Boot 2.7+, Spring WebFlux, Spring Security, Hibernate, PostgreSQL, AWS (Lambda, S3, Secrets Manager), Maven, Git
Industry: HealthTech

EMPLOYMENT HISTORY

• Java full stack developer

Description: Working as a Full Stack Java Developer and handle all technical things as a Team lead

EDUCATION

• Bachelors degree in Information Technology from Hasmukh Goswami College of Engineering 2012 - 2015

LANGUAGES

• English - advanced
