I have been a Frontend developer. A result oriented professional willing to work as a software engineer in a globally reputed company. Offering excellence in communication skills with team spirit and expertise in web development. Strong knowledge to convert business needs into technical specifications, workflow development,aim to work in a challenging environment My expertise includes JavaScript, React, Angular, Tailwind, and modern frameworks like Node, NestJS, Express, and CodeIgniter. I also have hands-on experience with REST APIs, MySQL, MongoDB, and cloud technologies like AWS. I actively work with tools such as VSCode and PhpStorm, ensuring efficient development workflows.

INDUSTRIES: Software, Software and Platforms, Health care, Community

TECHNICAL SKILLS

• React	6 years
• Bootstrap	6 years
• HTML	6 years
• JavaScript	6 years
• MySQL	6 years
• Rest API	6 years
• AWS	6 years
• Unit Testing	5 years
• NodeJS	5 years

SOFT SKILLS

Problem-solving, Teamwork, Time management

PROJECT DETAILS

• Order2UClude

Project Description: Multi-client, multi-domain, multi-role pharma-related eCommerce web application built with Angular and micro frontends (Module Federation)
Responsibilities: Architected and developed the front-end application using Angular, HTML, CSS, and JavaScript Integrated state management with NgRx Created unit test and regression test frameworks for existing and new code
Technologies: Angular, Bootstrap, NgRx (Redux-toolkit equivalent in Angular), Axios, JavaScript, HTML5, CSS, AWS
Industry: Software

• Transportation Management System

Project Description: Part of a larger Java-based portal, this Angular application manages routes and shipments, supporting real-time updates and GraphQL APIs.
Responsibilities: Designed and implemented front-end architecture in React and Material Design Integrated GraphQL APIs for dynamic data fetching Built unit and regression testing frameworks with Jest and Angular Testing Library
Technologies: React, GraphQL, Material Design, JavaScript, HTML5, CSS,AWS
Industry: Software and Platforms

• Health & Resource Administration

Project Description: Multi-company, multi-role system for employee health and resource management, including attendance, salaries, health scoring, and chat features.
Responsibilities: Architected and developed the front-end in React with Material components Integrated chat system and health Q/A logic Built backend services using Nest.js and Express, connected to MongoDB Created unit and regression test frameworks
Technologies: React, TypeScript, NestJS + Express, MongoDB, AWS
Industry: Health care

• Sparks Community

Project Description: Hierarchical community-building platform where users participate and earn rewards based on selection methods and activity.
Responsibilities: Front-end development in React with Bootstrap styling Backend setup with Node.js for handling user data and rewards logic Implemented fraud detection and payment system integration Ensured secure data management and protection
Technologies: React, Node.js, Bootstrap, MongoDB, AWS
Industry: Community

EDUCATION

• Bachelors degree in Bachelors of engineering from Jorhat Engg College 2012 - 2016

LANGUAGES

• English - native
