• Salesforce	9 years
• HTML & CSS	9 years
• Lightning Aura component	8 years
• J2EE	2 years
• RDBMS	2 years

PROJECT DETAILS

• CPQ — January-2024 - June-2025

Project Description: Zuora CPQ is the software built for any combination of subscriptions, products, and services for the entire subscriber lifecycle from sign-ups to renewals to upgrades. This section provides information about the Zuora CPQ, CPQ X, Zuora Quotes, and Zuora 360+/Zuora 360. I have learned about managing Account, contact and billing, payment, and Tax setup and also got understanding on Order actions for subscription management, Product catalog and charge models. We have used Visualforce, Apex, Lightning aura components, Lightning Web Component, REST Callouts, Javascript/Jquery, HTML, CSS in development and maintenance of the product. CPQ also provided Quote generation as PDF or Word Document generation which can be shared directly with other customers.
Responsibilities: As a Senior Salesforce developer, I worked on this project.
Technologies: Visualforce, Apex, Lightning aura components, Lightning Web Component, REST Callouts, Javascript/Jquery, HTML, CSS
Industry: Software Development

• Cora AP — January-2023 - February-2024

Project Description: Cora AP Flow is an end to end Accounts Payable automation solution that eliminates nonstandard manual processes & high cost of operations through its automated workflow. Its self service portal brings higher visibility and drives supplier satisfaction. We have used Visualforce, Apex, Process builders, Async Apex, Lightning aura components, Javascript/Jquery, HTML, CSS in development and maintenance of the product. Cora AP Flow removes process constraints, optimizes payment speed & accuracy cuts Operational Costs, Provides Global Visibility, automation & control of the full payable life cycle. This product also involves a Helpdesk module which provides email to case functionality to provide Customer relationships functionality. This module having capabilities to communicate between vendors and executives via emails to resolve queries and provide inputs. Project: Demand Side Manage
