PROJECT DETAILS

• Resumedone

Project Description: A SaaS application, which allows the user to build their Resume/CV online. It is one of the top applications that provide services to create an online resume and CV with multiple predefined templates. It also provides a wide range of features to get your resume reviewed by a professional. It can also customize your resume from the builder as per your needs. This application has multiple language support as well so that users can build a Resume in multiple languages.
Responsibilities: - Developed and maintained a fully responsive, high-performance web application using Next.js for server-side rendering and seamless UX. - Built robust backend APIs with Node.js and GraphQL, ensuring secure and scalable data operations across user profiles, templates, and resume components.
Technologies: Node.js, Next.js, AI Integration, PostgreSQL, Open AI, GraphQL
Industry: SaaS

• Stackpier

Project Description: It is a powerful termbase editor where users can create, edit, and manage multilingual glossaries.
Responsibilities: - AI-Integrated Translation Workspace: This is an intelligent editor that integrates AI suggestions to assist translators. It supports auto-generated translations (AGT), highlights enforced terminology, and provides real-time feedback. The editor was built with rich text capabilities and smooth keyboard navigation to support professional translation workflows
Technologies: Vue.js, REST APIs, TailwindCSS
Industry: Language Processing

• ElitegamingLive

Project Description: EliteGamingLive is dedicated to empowering students by providing a platform to develop their skills and prepare for the future.
Responsibilities: - Implementation of real-time socket functionality, engaging animations, and the establishment of the EliteGamingLIVE Academy. - Developed a robust multiplayer gaming infrastructure utilizing WebSocket technology to facilitate real-time communication between players, enhancing the gaming experience with seamless multiplayer functionality
Technologies: Node.js, Express.js, PostgreSQL, React.js, Reduxthunk, Web Socket, Tailwind CSS
Industry: Education
