I am a Backend Developer based in Surat with 8+ years of experience specializing in Node.js and backend architecture. I have strong expertise in building scalable APIs, server-side applications, and high-performance backend systems. My experience includes working with modern frameworks, databases, and cloud-based environments to deliver secure and reliable solutions. I am proficient in designing REST APIs, optimizing system performance, and implementing best coding practices. I collaborate closely with teams to translate business requirements into robust technical implementations. I am currently looking for a contract role as a Senior Backend Developer with a focus on Node.js development. My goal is to contribute to impactful projects while continuing to grow as a backend engineering professional.

INDUSTRIES: Blockchain, chat application, Project Management, ai, Social Media

• API Development	8 years & 9 months
• Mongo DB	8 years & 7 months
• Angular	7 years & 5 months
• React	7 years & 7 months

SOFT SKILLS

Problem-solving, Critical thinking, Teamwork

PROJECT DETAILS

• Avail bridge July-2024 - October-2025

Project Description: Integrated Web3.js with Node.js for Ethereum wallet and blockchain transactions. Built APIs for user authentication, transaction logging, and smart contract execution. Ensured security with JWT tokens, rate limiting, and input sanitization.
Responsibilities: To handle backend and team management for create and deliver project
Technologies: Node js
Industry: Blockchain

• ChitChat July-2021 - May-2022

Project Description: Developed a real-time chat system with WebSocket-based message exchange. Built APIs for message history, media uploads, and user presence tracking. Used Socket.io rooms for group and private chat management. Integrated file sharing and typing indicators for enhanced user experience.
Responsibilities: create a Backend and Frontend both in node js and also to handle a team of 4
Technologies: Technologies: Node.js, Express.js, Socket.io, MongoDB
Industry: chat application

• Team wise January-2023 - June-2024

Project Description: Developed a real-time chat system with WebSocket-based message exchange. Built APIs for message history, media uploads, and user presence tracking. Used Socket.io rooms for group and private chat management. Integrated file sharing and typing indicators for enhanced user experience.
Responsibilities: To handle backend and team management for create and deliver project and also to develop and maintain software
Technologies: Node js
Industry: Project Management

• Photo AI January-2024 - December-2024

Project Description: Developed backend for AI-powered image generation and wallet system. Integrated Stripe for subscription and one-time payment flows. Built APIs for coin-based transactions, history logs, and credit tracking. Used Firebase Functions for async background tasks and notifications.
Responsibilities: To handle backend and team management for create and deliver project on time
Technologies: Node.js, Express.js, Stripe, Firebase, Replicate API
Industry: ai

• Influenz June-2022 - December-2022

Project Description: Designed backend APIs for influencer campaigns, analytics, and user management. Integrated Firebase authentication and real-time updates using Firestore triggers. Developed scalable endpoints for search, campaign ROI tracking, and notifications. Implemented role-based access control (RBAC) and data validation layers.
Responsibilities: To handle backend and team management for create and deliver project and maintain project
Technologies: Node.js, Express.js, Firebase, Vue.js
Industry: Social Media

EMPLOYMENT HISTORY

• Senior Backend Engineer

Description: Sr backend developer

EDUCATION

• Diploma degree in Computer science from Vnsgu 2013 - 2016

LANGUAGES

• English - advanced
