I am a Ruby on Rails Developer based in Indore with strong experience in building scalable, secure, and high-performance web applications. I specialize in developing clean backend architectures, RESTful APIs, and efficient database workflows. My expertise includes creating custom software solutions, modern web platforms, and feature-rich applications that support business growth. I focus on writing maintainable code, improving application performance, and solving complex technical challenges. I enjoy collaborating with teams to deliver reliable, user-centric digital products. With a continuous learning mindset, I stay updated with modern frameworks and industry best practices. I am committed to contributing to impactful projects that drive innovation and deliver real value.

INDUSTRIES: Pharmaceutical

TECHNICAL SKILLS

• Ruby on Rails	2 years & 8 months
• JavaScript	2 years & 8 months
• HTML & CSS	2 years & 8 months
• AWS ec2	2 years & 8 months
• REST APIs	2 years & 8 months

SOFT SKILLS

Problem-solving, Communication, Teamwork, Critical thinking

PROJECT DETAILS

• Niramaya soul — April-2025 - August-2025

Project Description: Niramaya Soul is an innovative healthtech platform in India, designed as a comprehensive solution for a variety of medical needs. It acts as a one-stop destination for healthcare services, especially catering to users in tier-II, III, and IV cities

Responsibilities: Application Development: Designed, developed, and maintained core features of the healthcare platform using Ruby on Rails, ensuring scalability and performance. API Integration: Built and integrated RESTful APIs to connect pharmacy, diagnostics, and doctor consultation modules seamlessly with mobile and web applications. Database Management: Designed and optimized PostgreSQL/MySQL databases for patient records, prescriptions, and diagnostic data with a focus on data security and compliance (HIPAA-like standards in India). Authentication & Authorization: Implemented secure login, role-based access, and user session management for patients, doctors, and admins. Third-Party Services: Integrated third-party payment gateways, SMS/email notification services, and diagnostic lab APIs. Testing & Quality Assurance: Wrote RSpec test cases with FactoryBot and WebMock to ensure robust, bug-free code before deployment. Deployment & DevOps: Deployed the application on cloud platforms (AWS/Heroku/Render) with CI/CD pipelines for smooth delivery. Team Collaboration: Worked closely with frontend developers (React/Angular/Flutter), designers, and QA testers to deliver a seamless end-to-end healthcare experience. Performance Optimization: Enhanced application speed through caching, background jobs (Sidekiq/Resque), and query optimization.
