With over 8+ years of hands-on experience as a Python Backend Engineer, I excel in developing and deploying large-scale applications using Python, Flask, and Django. My expertise extends to cloud services, particularly AWS, where I efficiently manage and operate production services. I have a proven track record of leading and mentoring teams to success, ensuring projects are delivered on time and exceeding expectations. My passion for building and maintaining scalable systems drives me to continuously innovate and adapt to new technologies. Let's connect and leverage my skills to drive impactful business growth.

INDUSTRIES: Car Repair Scheduling, ondemand

TECHNICAL SKILLS

• Python	8 years
• SDLC	8 years
• Github	8 years
• PostgreSQL	8 years
• MySQL	8 years
• SQLite	8 years
• NoSQL	8 years
• MongoDB	8 years
• Firebase	8 years
• GraphQL	8 years
• Pytest	8 years
• Selenium	8 years
• Agile SCRUM	8 years
• Gitlab	8 years
• Django	8 years
• Flask	8 years
• FastAPI	8 years
• JavaScript	8 years
• jQuery	8 years
• Bootstrap	8 years
• Angular	8 years
• ReactJS	8 years
• Docker	8 years
• Jira	8 years
• Trello	8 years
• PyCharm	8 years

PROJECT DETAILS

• Car Repair Scheduling

Project Description: They offer intelligent resource and workforce planning solutions using advanced machine learning to improve operational efficiency and reduce planning complexity
Responsibilities: As a member of a development team, I worked on the Car Repair Scheduling project, which was designed to help a car repair company manage their appointments and track customer data more efficiently. I was responsible for developing REST APIs using Flask, and integrating various technologies such as Pandas, Matplotlib, PostgreSQL, and Redis into the project.
Technologies: Python, Flask, REST APIs, Pandas, Matplotlib, PostgreSQL, Redis, Dramatiq, Pytest, Agile - Jira
Industry: Car Repair Scheduling
