I am a Senior Software Engineer based in Mumbai with 6+ years of experience specializing in Ruby on Rails and backend development. I have a strong track record of building scalable applications, integrating third-party services, and improving overall system performance. My expertise includes API development, caching strategies, database optimization, and delivering smooth user experiences. I focus on writing clean, maintainable code and solving complex backend challenges. I collaborate effectively with teams to deliver solutions that support business goals and long-term product growth. With a continuous learning mindset, I stay updated with modern technologies and best engineering practices.

INDUSTRIES: Entertainment, Ecommerce
