I am a Senior Full Stack Developer based in Ujjain with 10 years of experience in building scalable and high-performing web applications. My core expertise lies in Ruby on Rails, React.js, JavaScript, and RESTful API development. I have strong skills in code optimization, debugging, and designing efficient database architectures using PostgreSQL and MySQL. I am experienced in deploying applications on AWS and working across domains such as healthcare, e-commerce, and enterprise platforms. I have a proven track record of leading teams, gathering client requirements, and delivering complete end-to-end solutions. I focus on writing clean, maintainable code and building user-centric digital products that align with business goals. I am driven by continuous learning and a passion for solving complex technical challenges.

INDUSTRIES: Healthcare, e commerce

TECHNICAL SKILLS

• Ruby on Rails	10 years & 2 months
• Ruby	10 years & 2 months
• MySQL	9 years & 5 months
• DevOps	8 years & 4 months
• React	6 years & 2 months

SOFT SKILLS

Communication, leadership

PROJECT DETAILS

• PatientIQ June-2022 - May-2024

Project Description: A healthcare data intelligence platform that helps hospitals and clinics collect, analyze, and report patient outcomes. It streamlines workflows, enhances decision-making, and improves patient care through real-time insights.
Responsibilities: Collaborated with cross-functional teams to gather and analyze healthcare requirements. Managed feature planning, progress tracking, and delivery. Ensured seamless integration of APIs and compliance with healthcare standards.
Technologies: Ruby on Rails, React.js, PostgreSQL, AWS, REST APIs
Industry: Healthcare
