MuleSoft Developer with 3.9 years of experience in designing, developing, and implementing integration solutions using API-led connectivity. Skilled in building scalable, secure APIs with strong expertise in RAML, CloudHub, and Anypoint Platform components. Proficient in integration workflows, error handling, and applying best practices for governance and reusability. Experienced in collaborating with C4E teams to deliver enterprise-grade solutions. Adept at working with CI/CD pipelines and automating integration deployments. Strong problem-solving abilities with a focus on optimizing performance and reliability. Passionate about modern integration patterns and exploring AI-driven capabilities to enhance integration ecosystems.

INDUSTRIES: Telecommunication, Pharmaceutical

TECHNICAL SKILLS

• Mulesoft	3 years & 10 months
• Anypoint Platform	3 years & 10 months
• anypoint studio	3 years & 10 months
• Java	3 years
• Database Integration	3 years & 10 months

PROJECT DETAILS

• Att — October-2021 - October-2022

Project Description: Migrated Mule Flows, i.e., experience, Process, and system API, as per Java microservices, following Agile Methodology.
Responsibilities: Modernized Legacy SOAP services based on Java to MuleSoft and exposed them as REST service to various interfaces. Consumed REST, SOAP, EJB, and Engineering provider systems within Mule.
Technologies: Mulesoft
Industry: Telecommunication

• Roche — January-2024 - July-2025

Project Description: Designed, developed, and maintained robust RESTful APIs
Responsibilities: Using MuleSoft Anypoint Platform to integrate with various systems, including scheduler services, SFTP connectors, EWM, and CBra. Leveraged MuleSoft's error handling, logging, and security best practices to ensure API reliability and data integrity.
Technologies: Mulesoft
Industry: Pharmaceutical

• DirecTV — October-2022 - December-2023

Project Description: API Implementation: Using MuleSoft Anypoint Platform to build APIs, incorporating connectors, transformers, and error handling mechanisms. Reusable Components: Developing reusable components like API fragments, policies, and connectors to streamline development efforts.
Responsibilities: Developed and optimized RESTful APIs to seamlessly integrate with various databases, including Elasticsearch, SQL, PostgreSQL, and Salesforce. As a member of MuleSoft C4E (Center for Enablement) developer team, i was part of following development. API Design: Creating well-structured and scalable APIs that align with business requirements and adhere to best practices.
Technologies: Mulesoft
Industry: Telecommunication

EMPLOYMENT HISTORY

• Mulesoft Developer September-2021 - August-2025

Description: Developer

CERTIFICATION

• Mulesoft Developer level 1 by Salesforce 2023

EDUCATION

• Bachelors degree in Information technology from Birla Institute of Technology Mesra 2017 - 2021

LANGUAGES

• English - advanced
