+91 9820045154 | hr@augmntx.com

QA Engineer with 2+ years of experience in both Manual and Automation Testing, ensuring high-quality and reliable software delivery. Skilled in functional, regression, and API testing with strong hands-on expertise in Selenium with Java, TestNG, and Cucumber (BDD). Proficient in API validation using Postman and backend verification using SQL. Experienced in Agile/Scrum environments, sprint collaboration, and effective defect management. Adept at writing test cases, creating automation scripts, and improving test coverage. Known for strong analytical abilities, attention to detail, and a commitment to delivering seamless user experiences. Focused on continuous learning and enhancing testing efficiency.

INDUSTRIES: HealthTech, Education Technology

TECHNICAL SKILLS

• Manual Testing	2 years & 3 months
• API Testing	2 years & 3 months
• Selenium Java automation programming	1 years & 3 months
• TestNG	1 years & 3 months
• Cucumber	1 years

SOFT SKILLS

Leadership

PROJECT DETAILS

• OneCare — January-2025 - October-2025

Project Description: OneCare is a comprehensive healthcare management platform designed to streamline end-to-end workflows across telehealth, patient records, inventory management, and lab modules. The system enables hospitals and clinics to manage consultations, appointments, medicines, and medical reports efficiently.
Responsibilities: Performed end-to-end functional testing across Telehealth, Inventory, Billing, and Patient Lab modules. Designed and executed test cases, regression suites, and integration testing for multiple modules. Collaborated with developers to validate API responses and backend logic.
Technologies: TestNG
Industry: HealthTech

• Neohire — June-2025 - October-2025

Project Description: NeoHire is a hiring and recruitment automation platform that manages complete candidate lifecycle flows, including job creation, event setup, multi-stage interview process, evaluations, test scheduling, offers, and onboarding.
Responsibilities: Automated workflows for job role creation, candidate registration, multi-stage interviews (screening to offer) using Selenium + Cucumber. Developed reusable automation frameworks and maintained feature files, step definitions, and data-driven scripts. Increased automation coverage to ~70% of regression cases, significantly improving release cycle confidence. Executed cross-browser and functional testing for all 7 interview stages. Integrated reports and enhanced test execution using Cucumber HTML reports.
Technologies: Cucumber
Industry: Education Technology

EMPLOYMENT HISTORY

• QA Engineer September-2024 - December-2025

Description: Scripted and implemented automated test scenarios for vendor management, improving test reliability by 25%. Coordinated UAT across 3 cross-functional teams, ensuring timely release sign-offs. Tools: Selenium, Postman, Playwright , ClickUp

• QA Engineer January-2025 - October-2025

OneData Software Solutions

Description: Designed Functional test cases and systematized regression suites. Delivered QA reports with >90% test coverage and tracked 100+ issues in YouTrack. Tools used: Selenium, TestNG, Postman, Youtrack

EDUCATION

• Masters degree in Computer Application from Bharathiar University 2025 - 2027

• Bachelors degree in Computer Science from Bharathiar University 2020 - 2023

LANGUAGES

• English - advanced
