+91 9820045154 | hr@augmntx.com

Ruby on Rails Developer with solid experience in building scalable, high-performance web applications and robust backend systems. Skilled in developing RESTful APIs, database design, and integrating third-party services. Focused on writing clean, maintainable code and following best development practices. Adept at improving system performance, optimizing queries, and enhancing application reliability. Experienced in debugging, code reviews, and working within Agile teams to deliver quality software. Passionate about continuous learning, backend architecture, and contributing to impactful, user-centric products.

INDUSTRIES: Software

TECHNICAL SKILLS

• Ruby	3 years
• Rails	3 years
• HTML & CSS	2 years
• Github	2 years & 6 months
• PostgreSQL	2 years

PROJECT DETAILS

• Real Estate Management — July-2022 - January-2023

Project Description: Developed a comprehensive role-based property management platform that enables users to buy, sell, explore, and receive real-time updates on real estate listings. Integrated advanced search functionality and automated property alerts to enhance user engagement and streamline property transactions.
Responsibilities: Developed backend APIs and database models using Ruby on Rails and PostgreSQL. Designed and optimized database schemas to handle property data, user profiles, and search queries. Integrated real-time notification systems for property alerts and updates.
Technologies: Ruby on Rails
Industry: Software

• Vonahi Security — February-2023 - August-2024

Project Description: A platform designed to monitor server health and perform automated security scans for identifying vulnerabilities and performance issues.
Responsibilities: Worked as a Ruby on Rails backend developer, focusing on API development and database management using ActiveRecord. Wrote RSpec test cases to ensure code quality and reliability. Communicated directly with the client to gather requirements and delivered work within specified timelines.
Technologies: Ruby on Rails
Industry: Software

EMPLOYMENT HISTORY

• Junior Software Developer (ROR) — September-2024 - May-2025

Description: Designed, implemented, and maintained unit and integration tests to ensure code reliability and reduce bugs. Collaborated with cross-functional teams to develop scalable and efficient backend solutions. Built RESTful APIs to enhance system integration and optimize application performance.

• Software Developer (ROR) February-2022 - August-2024

Backbencher Technologies

Description: Led a team of four developers in designing, developing, and deploying web applications, ensuring best coding practices and timely project delivery. Mentored junior developers during onboarding and training, and conducted code reviews to maintain high code quality. Collaborated across teams to implement efficient backend systems and developed RESTful APIs to streamline service communication and enhance system functionality.

EDUCATION

• Bachelors degree in B.Tech (CS) from Shri Satya Sai University Of Technology andn Medical Science, Sehore (MP) 2019 - 2023

LANGUAGES

• English - intermediate
