# Bhagtani P

Software Engineer, 2+ years experience
Kanpur, India
https://augmntx.com/profile/software-engineer-bhagtani-p/axf28759

+91 9820045154 | hr@augmntx.com

Full Stack Developer with experience in Java, Angular, Spring Boot, SQL, and Python. Skilled in designing and developing REST APIs, full-stack applications, and scalable backend systems. Hands-on experience integrating frontend and backend components for seamless application performance. Familiar with implementing machine learning models and data-driven solutions in projects. Focused on building robust, maintainable, and high-performance software. Adaptable and collaborative, capable of working effectively in dynamic team environments. Passionate about leveraging technology to create real-world impact and drive business value.

**INDUSTRIES:** Airport, EStudy

## TECHNICAL SKILLS

| | |
|---|---|
| • Java | 2 years & 1 months |
| • Springboot | 2 years & 1 months |
| • Angular | 2 years & 1 months |
| • MySQL | 2 years & 1 months |
| • Jira | 2 years & 1 months |

## PROJECT DETAILS

• Air Cargo

Project Description: deal with Import, Export and transhipment of Cargo .
Responsibilities: My responsibilities will include designing and maintaining scalable backend services using Java Spring Boot and SQL. I will develop clean and reliable APIs, optimize database queries and performance, and collaborate with teams to integrate backend systems with frontend and data pipelines. I will also write unit tests, follow best coding practices, and continuously learn new technologies to contribute effectively to any culture of innovation.
Technologies: Java, Angular, SpringBoot, MySQL
Industry: Airport

• Exam Portal Management

Project Description: Developed a web-based Exam Management System using Java, Spring Boot, Angular, and MySQL to streamline the process of conducting and managing exams. The system allowed administrators to create and manage question banks, schedule exams, and assign them to students. Students could log in, attempt exams, and view results in real time. The backend was built with REST APIs in Spring Boot, ensuring secure data handling and smooth communication between frontend and database. Implemented features like role-based access, automated result calculation, and responsive UI with Angular for a seamless user experience.
Responsibilities: As a backend engineering intern my responsibilities will be to build and enhance backend services using Java Spring Boot and SQL. I will focus on creating efficient APIs, improving performance, and ensuring reliable data handling. I will work with other teams to deliver seamless integration, maintain code quality through testing, and actively learn and contribute to projects.
Technologies: Java, Angular, SpringBoot, MySQL
Industry: EStudy

## EMPLOYMENT HISTORY

• Software Developer

Description: Java Full Stack

## EDUCATION

• Bachelors degree in Computer Science from UIET, Kanpur 2019 - 2023

## LANGUAGES

• English - native
