Creative and passionate Web Developer with 5 years of experience specializing in Ruby on Rails. Skilled in building complex, scalable REST APIs that seamlessly integrate with mobile applications (Android iOS) and third party web platforms. Strong expertise in backend development, database design, and optimizing application performance. Adept at delivering clean, maintainable code and implementing secure, reliable API solutions. Focused on solving real world problems through efficient architectures and user centric functionality. Committed to continuous learning and contributing to high quality, impactful web applications.

INDUSTRIES: Business management, Job Portal

TECHNICAL SKILLS

• Rails	5 years
• PostgreSQL	5 years
• RSpec	5 years
• React	4 years
• AWS	2 years

PROJECT DETAILS

• ProcessKit

Project Description: ProcessKit is an advanced business management tool designed to streamline and optimize task and process management. It empowers business teams to efficiently execute client onboarding processes, ensuring repeatability and predictability. The platform enables comprehensive management of client information and facilitates dynamic integration of client details into onboarding tasks. ProcessKit also offers robust tracking capabilities, allowing real-time monitoring of progress across every stage of the client pipeline.

Responsibilities: Led the development and maintenance of core features as a Senior Full Stack Ruby on Rails Developer. Implemented an AI text generation module with file upload functionality by integrating OpenAI for AI powered features. Developed a dynamic AI router function, enabling admins to seamlessly switch between AI providers (e.g., OpenAI, Gemini) from the admin panel. Integrated Stripe for secure and scalable payment processing functionality. Resolved complex bugs and optimized existing code to improve the performance and stability of features developed by previous teams. Implemented functionality to convert text into PDF files by integrating the third-party HTML to PDF Rocket API. Working on RSpec

Technologies: Ruby on Rails (Version 6), OpenAI, Turbo, Stimulus, JavaScript, HTML, CSS, PostgreSQL, RSpec

Industry: Business management

• Work Centivo

Project Description: An application like LinkedIn where recruiters can create a job and Job applicants can apply for a job and based on a subscription plan those Job applicants can be on top of the search list and be highlighted to the recruiters and both users can create posts/comments and can communicate with each other.

Responsibilities: I have worked as a backend senior ROR Developer. I have created an Admin panel using Active admin gem. I have created APIs for creating social media posts, listing them, save posts, saved posts listing, and like/dislike posts like LinkedIn. I have created APIs for following, followers, and managing connections of users. Working on RSpec I have created APIs for creating jobs, listing them, saving jobs, applying jobs, and listing them, with different filters and sorting. I have created APIs for creating post comments, replied comments, like/dislike comments like LinkedIn.

Technologies: Ruby on Rails (Version 7), JavaScript, HTML, CSS, Tailwind CSS, PostgreSQL, JWT, Rest API, RSpec

Industry: Job Portal

EMPLOYMENT HISTORY

• Software Developer

Description: Enthusiastic and passionate web developer with 5+ years of experience in Ruby on Rails. Proficient in building robust web applications using Ruby on Rails. Demonstrated proficiency in all phases of development including requirement gathering, requirement analysis, efforts estimation, design, development, code review and refactoring, deployment, and post implementation support. Strong software development skills and experience in building web applications from initial specification to final deployment and acceptance. Experienced in writing and maintaining RSpec tests across multiple projects, ensuring robust test coverage and improved code quality. Familiar with Agile processes and project management tools. Provide direction and mentoring to junior developers.

EDUCATION

• Bachelors degree in Computer Engineering from GTU 2017 - 2020

LANGUAGES

• English - intermediate
