• Eyva December-2024 - May-2025

Project Description: Developed a comprehensive web application for Eyva, an innovative healthcare device that tracks multiple vital health metrics, including Blood Glucose, HbA1c, ECG, Blood Pressure, Oxygen, and Heart Rate. The project included a landing page, booking systems (pre-booking and full-booking), and a blogging platform. As the sole developer, I completed the project independently within 6 months, demonstrating my ability to manage large-scale projects efficiently and autonomously.

Responsibilities: Designed and implemented responsive user interfaces for optimal viewing across various devices. Created complex animations to enhance user experience and engagement. Successfully migrated the entire application from Angular 16 to Angular 18, handling deprecations and adopting new features. Created complex animations to enhance user experience and engagement

Technologies: Frontend: Angular 19, Tailwind CSS, Bootstrap, Firebase, UI/UX, Rxjs Backend: Node.js, Express Languages: TypeScript, JavaScript

Industry: Health care
