Lead Power BI Developer with strong expertise in building data-driven solutions that enhance decision-making, operational efficiency, and business growth. Skilled in creating real-time dashboards, interactive reports, and scalable data models. Experienced in transforming complex datasets into clear, actionable insights that support strategic planning. Known for strong problem-solving abilities, attention to detail, and a commitment to delivering high-quality analytics solutions. Passionate about leveraging data to drive performance and empower informed decisions.

INDUSTRIES: Insurance, Finance

TECHNICAL SKILLS

• POWER BI	6 years & 2 months
• Power BI Desktop	6 years & 2 months
• DAX	4 years
• SQL	4 years
• Data Analyst	4 years

PROJECT DETAILS

• North America claims — February-2024 - June-2025

Project Description: The North America Claims Analytics Dashboard was developed to consolidate claims data from multiple regional offices across the U.S. and Canada into a single, interactive reporting platform in Power BI. The solution integrates policy data, claims transactions, adjuster logs, and payment records from SQL Server, Excel files, and an internal claims management system.
Responsibilities: Build a centralized claims analytics dashboard for North America to monitor claim volumes, settlement timelines, and loss ratios, enabling leadership to make faster, data-driven decisions.
Technologies: power bi, power query, dax,data modelling,sql server.
Industry: Insurance

• finance analysis — February-2023 - April-2024

Project Description: We built the Finance Performance and Risk Analysis Dashboard to help Davies Group leaders see the companys full financial picture. All the data from systems like SAP, the general ledger, accounts payable and receivable, and cost centers was combined into one dashboard.
Responsibilities: Built a complete Power BI solution to track financial performance, analyze costs, and assess risks for all Davies Group business units.
Technologies: power bi , dax, data modelling, sql server.
Industry: Finance

EMPLOYMENT HISTORY

• lead power bi

Description: I designed a global sales analytics solution integrating 12 data sources. By optimizing the model and implementing incremental refresh, we reduced load time from 90 minutes to under 5 minutes.”

CERTIFICATION

• Moghal Usman Baig by UDAMY — 2020

EDUCATION

• Masters degree in MBA from JNTU 2017 - 2019

LANGUAGES

• English - advanced
