With over 7 years of experience in data analytics and business intelligence primarily using Power BI and SQL Server I bring strong hands-on expertise in dashboard development, data modeling, DAX, and stakeholder management. I have worked extensively across domains including banking, utilities, and energy, and have delivered scalable Power BI solutions integrating data from various sources like SQL, Azure, and Denodo. I also have solid experience with SSAS, SSRS, and report optimization techniques. Additionally, I have handled client-facing responsibilities and project ownership in my current and past roles. I am available to join immediately and would welcome the opportunity to discuss how my background aligns with your team needs.

INDUSTRIES: green energy, Oil and Gas, Ecommerce, Manufacturing, Medical Equipment

TECHNICAL SKILLS

• POWER BI	6 years & 3 months
• SQL	5 years
• SSIS	4 years
• SSAS	2 years & 1 months
• SSRS	1 years

PROJECT DETAILS

• Next Era Energy — April-2025 - May-2025

Project Description: leading energy infrastructure company in North America, boasting the largest and most diverse portfolio of power generation solutions. It is also the world's largest electric utility holding company
Responsibilities: Maintaining and managing SSAS multidimensional cubes to support business intelligence and reporting needs. Regularly updated SQL Server Agent job scripts to accommodate changes in data availability
Technologies: SSAS
Industry: green energy
Link: https://www.nexteraenergy.com/

• Williams Oil and Gas — November-2024 - March-2025

Project Description: Its core business involves processing, transporting, and delivering natural gas.
Responsibilities: Create paginated reports using Power BI Report Builder to meet business requirements Accessed Oracle Database to build paginated reports for detailed and structured reporting and Optimize query performance to ensure fast report rendering Performed data modeling and designed star schema and snowflake schema for efficient data storage and analysis in SSAS cubes
Technologies: SSRS
Industry: Oil and Gas
Link: https://www.williams.com/

• SBR May-2023 - July-2024

Project Description: company that rents a wide variety of equipment, including general construction equipment, industrial tools, pumps, power generation, and climate control solutions. They have over 950 locations and offer more than 14,000 types of equipment, aiming to support customers in building and maintaining infrastructure.

Responsibilities: Accessed Denodo ODBC connector to pull data for reporting and analysis. Involved in creating power Bi reports in Import and Direct Query Mode. Data cleaning operation using Power Query. Conducted regular performance testing and optimization of SSAS cubes and tabular models to ensure high availability and improved query performance. Writing Data Analysis Expressions (DAX) like Aggregate Functions and Filter Functions and Time & Date Functions and Logical Functions. Created Calculated Columns and Measures with DAX functions. Created visuals like KPI, Line, Bar, Scatter Plot, table, matric, Waterfall Chart and Heatmap, Tree map, Card, Multi card, Area chart, Pie chart, Donut chart etc. Collaborated with business users to gather requirements and build custom reports/dashboards. Worked with Bookmarks, Selection Pane, Slicers and Edit interactions. Implemented Row Level Security (RLS) as per requirement. Scheduled Automatic refresh and scheduling refresh in power bi service

Technologies: Power BI

Industry: Ecommerce
