+91 9820045154 | hr@augmntx.com

Full Stack Developer with 5+ years of experience architecting and deploying scalable, microservices based applications. Skilled in MERN, Next.js, Azure, and modern cloud native development. Experienced in building high-performance, secure, and maintainable solutions tailored to business needs. Strong expertise in system performance optimization and backend frontend integration. Proficient in CI CD pipelines, GitOps practices, and automated deployments. Adept at leading agile teams, collaborating across functions, and delivering production ready applications. Focused on clean code, modern architectures, and continuous improvement.

INDUSTRIES: Property Brocker Management, Industrial

TECHNICAL SKILLS

• React js	5 years
• Redux	5 years
• Next JS	4 years
• Node js	3 years
• Express	3 years

PROJECT DETAILS

• Property Search & Marketing — July-2020 - July-2023

Project Description: Developed a dynamic real estate marketing website to showcase property listings along with detailed floor plans. Im- plemented advanced filtering features to help users search properties by location, rent, bed/bath count, and more.
Responsibilities: Built with React.js for interactive UI, PHP & Smarty templates for backend rendering, and PostgreSQL for managing property data. Ensured seamless user experience through responsive design and optimized query performance.
Technologies: React, Node, PHP, PostgreSql, Context
Industry: Property Brocker Management

• Engineering Document Management

Project Description: Designed and developed a document extraction and management platform for engineering teams to automatically ex- tract metadata (e.g., item codes, revision numbers) from folders and files, register them, and enable role-based updates and file access via a built-in document viewer.
Responsibilities: Implemented RBAC and modular architecture for secure, scalable document access and permission management. Enhanced operational efficiency by reducing manual data entry and retrieval tasks through smart automation and AI assistance. Applied clean architecture and scalability principles to support high-volume engineering data workflows.
Technologies: React, Node, Express, Redux, Azure Devops, CosmosDB
Industry: Industrial

EMPLOYMENT HISTORY

• Sr FullStack Developer

Description: Led the design and development of scalable, component-driven front-end architectures using React.js and modern JavaScript (ES6+), improving maintainability and reusability by 60%. • Built full-stack solutions with Node.js APIs and microservices, enhancing system scalability and reducing latency by 30%. • Implemented performance optimizations including lazy loading, memoization, and code-splitting, resulting in a 50% reduction in initial load time. • Conducted code reviews and established front-end best practices, reducing post-deployment bugs by 40% and improving overall code quality. • Mentored junior developers on React.js, hooks, state management, and debugging, accelerating onboarding and team efficiency by 35%.

• Software Engineer July-2020 - July-2023

Entrata

Description: Developed a dynamic real estate listing platform using PHP, React.js, and Post- greSQL, allowing users to search and view detailed property listings with floor- Pune Jul 2020 - Jul 2023 plans and media. • Integrated interactive property views and filters in React.js, improving user en- gagement and conversion rate. • Wrote backend logic in PHP to handle property data management, floor plans, and media content, including advanced filtering and sorting. • Contributed to optimizing database queries in PostgreSQL, improving page load time and data retrieval efficiency by 30%. • Collaborated in an Agile environment, participating in daily stand-ups, sprint plan- ning, and retrospectives to ensure timely feature delivery.

EDUCATION

• Bachelors degree in Information Technology from Pune 2017 - 2020

LANGUAGES

• English - advanced
