Software Developer I am a passionate software developer with over three years of experience in creating dynamic web applications. My expertise lies in frontend development using technologies like ReactJS, Next.js, and Redux, focusing on high-quality, responsive user interfaces. Frontend Skills ReactJS Next.js Redux JavaScript (ES6/TypeScript) HTML5 & CSS3 SCSS & Tailwind CSS Webpack Backend & Tools Node.js & Express.js for RESTful APIs MongoDB for database management Git, Docker, Kubernetes, Jest CI/CD pipelines, Jira Microservices & Ingress NGINX Continuous Learner I am committed to continuous learning and innovation, eager to apply my skills to develop impactful and scalable solutions. Let's connect and explore opportunities to collaborate!

INDUSTRIES: webiots, interview kickstart, khoros

TECHNICAL SKILLS

• React js	4 years
• Jest	4 years
• Type script	4 years
• HTML & CSS	4 years
• Nextjs	4 years
• TailwindCSS	4 years
• Scss	4 years
• ShadCN	4 years
• Jira	4 years
• RESTful APIs	4 years
• Git	4 years
• Docker	4 years
• NodeJs	4 months
• ExpressJS	4 months
• Kubernetes	4 months
• Microservice	4 months
• Ingress NGINX	4 months

PROJECT DETAILS

• VOXO Multipurpose Ecommerce July-2021 - November-2023

Project Description: -- Modern Web Technologies: Developed a cutting-edge e-commerce platform using Next.js and Redux Toolkit to ensure optimal state management and scalability. -- Advanced Styling Techniques: Implemented SCSS for sophisticated, maintainable styling, enhancing the visual appeal and user interface. -- React Ecosystem Utilization: Leveraged React Hooks to streamline functionality and improve the performance of functional components. -- User Experience Focus: Delivered a responsive and intuitive user interface, significantly improving the overall shopping experience for users.

Responsibilities: -- As a Frontend Developer, i have to design and develop responsive e-commerce platforms and admin panels using SCSS, React, and Next.js, focusing on creating reusable components and ensuring optimal performance and cross-browser compatibility.

Technologies: Next JS, Redux Toolkit, React Hooks

Industry: webiots

• Uplevel August-2024 - July-2025

Project Description: -- Developed and maintained Uplevel, a web-based platform serving as both a student portal and an instructor admin dashboard, enabling seamless academic management and communication. -- Utilized Django Templates, JavaScript, and jQuery to build interactive and user-friendly interfaces tailored to students and instructors. -- Implemented key features such as interview scheduling, instructor-student call bookings, progress tracking, and resource sharing to enhance the learning experience. -- Ensured smooth user experience by developing responsive UI components and optimizing page load times. -- Collaborated with cross-functional teams to refine user workflows and improve operational efficiency across the platform.

Responsibilities: -- Designed and implemented reusable UI components using ReactJS, Redux, JavaScript, and Django Templates, significantly reducing development time and promoting code consistency across projects. -- Enhanced application accessibility and user experience by optimizing interfaces for responsiveness, usability, and cross-platform compatibility. -- Contributed to the development of the Uplevel Student Portal, enabling students to seamlessly access learning resources, track progress, and interact with the platform. -- Built and optimized the Instruct e Admin Portal, providing administrators with robust tools for managing content, users, and platform analytics.

Technologies: Django, java script, jquery, ReactJs, Nextjs, webflow

Industry: interview kickstart

• Khoros Next Generation August-2023 - August-2024

Project Description: -- Khoros Next Generation: A unified application that integrates classical marketing and care functionalities. -- Combination of Features: Offers both traditional and new designs from classical marketing and care. -- Single Application Advantage: Users can access both care and classical marketing services within the same app. -- Enhanced User Experience: Streamlines workflow by providing a cohesive interface for managing marketing and customer care tasks

Responsibilities: -- Engineered reusable components using ReactJS, Redux, and Immutable.js to streamline development and ensure consistency. -- Enhanced user interfaces, improving accessibility and usability across platforms. -- Developed Khoros Next Generation, integrating marketing and care functionalities into a unified application.

Technologies: Reactjs, Redux, Highcharts,

Industry: khoros

EMPLOYMENT HISTORY

• Software Engineer August-2024 - July-2025

Description: • Designed and implemented reusable UI components using ReactJS, Redux, JavaScript, and Django Templates, significantly reducing development time and promoting code consistency across projects. • Enhanced application accessibility and user experience by optimizing interfaces for responsiveness, usability, and cross-platform compatibility. • Contributed to the development of the “Uplevel Student Portal”, enabling students to seamlessly access learning resources, track progress, and interact with the platform. • Built and optimized the “Instrucut e Admin Portal”, providing administrators with robust tools for managing content, users, and platform analytics.

CERTIFICATION

• Kiran Manjibhai Pipaliya by GTU 2019

EDUCATION

• Diploma degree in Information Technology from GTU 2016 - 2019

LANGUAGES

• English - advanced
