Software professional with 13+ years of experience in analysis, design, and development of enterprise applications using Microsoft and modern web technologies. Skilled in C#.NET, ASP.NET, MVC, Web API, Angular 6+, React, JavaScript, and jQuery. Strong expertise in SQL Server, Entity Framework, and ADO.NET for building robust backend systems. Experienced in designing scalable architectures and implementing design patterns for high-performance solutions. Proficient in CI/CD pipelines and cloud platforms including Azure and AWS. Adept at integrating front-end and backend components to deliver secure, efficient applications. Known for strong problem-solving skills, clean coding practices, and end-to-end project ownership.

INDUSTRIES: Software and Platforms

TECHNICAL SKILLS

• C#	13 years
• .NET Framework	13 years
• Web API	6 years & 3 months
• SQL Server	5 years
• AWS	5 years
• Azure	5 years
• Integration Testing	5 years
• .NET Core	4 years & 3 months

SOFT SKILLS

Critical thinking, Teamwork, Time management

PROJECT DETAILS

• DHL Sameday

Project Description: Lead, Manage, Technical Support, Guide and Mentor the team. Analysis and understanding of requirements.

Responsibilities: Participate in business and system requirements sessions. Work with cross work streams and determining solution design impacting the core frameworks and components. Involvement in Analysis, Design, Coding, Testing, Support & Maintenance. Defects and Security issues fixing based on the security run report generated by security teams. Deployment and Development plan discuss with Business

Technologies: .Net Core, MSSql

Industry: Software and Platforms

• WBN Cloud Integrated Business

Project Description: Lead and manage the full SDLC, providing architectural direction and mentoring team members. Designed microservice-based architecture using .NET Core with Azure-native services.
Responsibilities: Implemented scalable, event-driven API development with Cosmos DB as the primary data store. Designed and developed frontend modules using React with secure role-based access control. Participated in business requirement workshops, solution design meetings & estimations. Responsible for high-level & low-level architecture, component design, and technical documentation. Ensured application performance, resilience, high availability & disaster recovery on Azure. Performed reviews code, architecture, and DB designto maintain coding standards and quality. Worked on CI/CD pipelines for automated build, testing, security compliance & deployment to Azure. Handled production support, change management, issue analysis, and optimization
Technologies: : .NET Core, Azure Cloud, Cosmos DB, React
Industry: Software and Platforms

EDUCATION

• Masters degree in Master of Computer Application from Uttar Pradesh Technical University, U.P. 2008 - 2011

LANGUAGES

• English - native
