Working for 12+ years in the Microsoft .NET development industry. Extensive knowledge of Client/Server and Web-based applications using Visual Basic 6.0, ASP, ASP.NET (1.1/2.0/3.5), .NET Core, ADO.ENT, C#, VB.NET, Web Services, Blazor, JavaScript, TypeScript, JQuery, ASP .NET MVC, .NET Web API, MSSQL. Cloud-based solutions (Azure App Services, Azure Functions, Azure Logic Apps, Azure SQL, Service Bus, App Insights, APIM, Azure container with Docker, Azure container registry, and AWS). Online Courier Delivery API: UPS, FedEx, Delivery, Blue Dart etc. Along with development, communicate with the team and stakeholders, suggesting and delivering the right technical solution to the requirements. Experience with source code management techniques using Git. A good team player with strong ability to learn and adapt new skills, and makes efforts to do the work at hand and manage time effectively.

INDUSTRIES: Software Application, e commerce

TECHNICAL SKILLS

• SQL	9 years & 4 months
• ASP.NET MVC	6 years
• .NET	5 years & 9 months
• .NET Core	5 years & 5 months
• Azure Blob Storage	5 years
• Azure	4 years & 8 months
• Web API	4 years & 7 months

PROJECT DETAILS

• Crypto Repair Tool (Harp)

Project Description: The HARP system is a dynamic and customizable panel designed to manage crypto tool repair business operations through its advanced and versatile functionalities. It caters to a wide range of organizational needs, providing flexibility, scalability, and ease of use in managing various administrative tasks. Additionally, HARP supports an advanced reporting system

Responsibilities: Developed Panel with support for repair detail creation and database isolation across SQL Server. Implemented a Role-Based system to ensure secure and flexible navigation management, allowing customized access for different user roles. Optimized Performance for Scalability, ensuring smooth functionality across various devices. Developed Dynamic CRUD Pages with server-side pagination, filtering, and sorting for efficient data management. Alert on system failures or specific data thresholds using logic App

Technologies: C#, ASP.NET Core MVC, Razor Views, Blazor, JQuery Datatable, SQL Server, Git, Bootstrap, HTML, SCSS, .Net Core Web API, Azure API Management, MediatR, Logic Apps, Entity Framework, NReco.PDF Generator, Dropbox integration, IIS

Industry: Software Application

• Inventory Management

Project Description: Managing large inventory data and managing import export functionality with inventory details.

Responsibilities: Developed robust inventory system to manage customer order. Implemented Role Based system to ensure secure and flexible navigation management, allowing customized access for different user roles. Developed Dynamic CRUD Pages with server side pagination, filtering, and sorting using DevExpress controls and generated dynamic DevExpress reports. Managed database design and optimization using MS SQL Server; created stored procedures. Implemented azure functions to upload files on Dropbox which is triggered as HTTP request

Technologies: C#.Net, WPF, SQL Server, TFS, .Net Core Web API, Entity Framework, DevExpress, DevExpress reporting, PDF merging, Dropbox integration, Azure devops, Outlook SMTP, Azure functions

Industry: e commerce

EDUCATION

• Bachelors degree in Engineering in CSE from Gujarat University 2007 - 2011

LANGUAGES

• English - intermediate
