Full Stack Developer with 8+ years of experience building scalable web and mobile applications. Specialized in React Native and React, with strong expertise in JavaScript and TypeScript ecosystems. Proficient in backend development using Node.js and modern API-driven architectures. Experienced in deploying cross-platform mobile apps to both the Play Store and App Store. Skilled in optimizing performance, improving app stability, and implementing clean, maintainable code structures. Adept at delivering seamless, responsive user experiences across multiple devices and platforms. Committed to developing high-quality, production-ready applications with modern UI/UX practices.

**INDUSTRIES:** SaaS Business Intelligence, Media Entertainment

## TECHNICAL SKILLS

| | |
|---|---|
| • JavaScript TypeScript | 8 years |
| • Node.js Express.js | 6 years |
| • React Native | 5 years |
| • Next.js | 5 years |
| • AWS & Cloud Deployment | 2 years |

## PROJECT DETAILS

• SQOR — September-2021 - June-2023

Project Description: SQOR is a SaaS analytics platform that leverages AI to provide simplified, actionable Business Intelligence for startups and SMEs. It simplifies data access, visualization, and payment-based access.
Responsibilities: Built mobile dashboards using React Native for on-the-go analytics. Integrated Stripe payment gateway for premium plan purchases. Worked with RESTful APIs and MongoDB for real-time analytics flow. Led implementation of responsive web interfaces in Next.js. Coordinated across product, data, and testing teams using agile sprints.
Technologies: React Native, Next.js, Node.js, MongoDB, RESTful APIs, TypeScript,
Industry: SaaS Business Intelligence

• Fanguru — January-2022 - August-2023

Project Description: FAN GURU is a community-centric platform designed for fans of comics, anime, esports, and pop culture. It enhances event experiences by allowing users to connect, share, and engage beyond the events themselves.
Responsibilities: Developed cross-platform mobile features using React Native. Integrated complex visualizations using D3.js for event insights. Created reusable UI components with TypeScript and Next.js. Collaborated with backend team to manage SQL data flow via Node.js APIs. Optimized app performance and ensured App Store/Play Store compliance
Technologies: React Native, Next.js, Node.js, SQL, TypeScript, JavaScript, D3.js
Industry: Media Entertainment

## EMPLOYMENT HISTORY

• React Developer

Description: React Developer

## EDUCATION

• Bachelors degree in Computer Science / Information Technology from ujarat Technological University 2011 - 2015

## LANGUAGES

• English - advanced
