Having 3+ years of Salesforce development experience. Good Knowledge of SFDC standard Data structures and familiarity with designing Custom Objects and Force.com platform. Including experience with APEX programming and Visual force as well as Lightning experience.

INDUSTRIES: Salesforce Package, Sales, Real Estate

TECHNICAL SKILLS

• Apex Class and Triggers	3 years
• Lightning Web components LWC	2 years
• Asynchronous apex	2 years
• Salesforce Admin	2 years & 6 months
• Salesforce CLI	2 years
• Flows	2 years & 6 months
• Visual Force	2 years
• Git	1 years & 6 months
• Azure DevOps	1 years
• Conga & Conga Sign	1 years
• Github	1 years & 6 months
• DocuSign	3 months
• OmniScripts	4 months
• Aura components	6 months

PROJECT DETAILS

• Mass DML — April-2023 - June-2023

Project Description: This software helps the Client and its organization for implementing the bulk changes and deletion of records in SFDC system. Implemented the solution by the means of Custom code.
Responsibilities: This software helps the Client and its organization for implementing the bulk changes and deletion of records in SFDC system. Implemented the solution by the means of Custom code. Working under Team Lead, on his/her instructions
Technologies: Lightning web components, Batch Classes, Triggers, Apex Classes and Scheduled Apex
Industry: Salesforce Package

• Stahl — January-2024 - July-2025

Project Description: This helps Client to maintain the Order Management System and contains solution designed to streamline the entire process of managing orders, from creation to fulfilment.
Responsibilities: This helps Client to maintain the Order Management System and contains solution designed to streamline the entire process of managing orders, from creation to fulfilment. Working with client, taking calls on regular basis, gathering requirements
Technologies: Lightning Web Components (LWC), Lightning Flows, Visual Force Pages, Apex Classes, Test Classes, Lightning Component, Integration.
Industry: Sales

• Dubai Properties

Project Description: Implemented automated document generation using Conga Composer to streamline creation of SOA, Receipts, Invoices, NOC and SPA documents. Configured templates, integrated them with Salesforce records using custom buttons and Apex logic, and ensured accurate data mapping.
Responsibilities: Implemented automated document generation using Conga Composer to streamline creation of SOA, Receipts, Invoices, NOC and SPA documents. Configured templates, integrated them with Salesforce records using custom buttons and Apex logic, and ensured accurate data mapping. Worked on Jira Ticekts & Techub incidents , Techub request on daily basis.
Technologies: Conga Composer Configuration & Template Setup, Lightning Web Components, Triggers, Apex Classes, User Permissions and Access Management and Custom Buttons and URL Logic.
Industry: Real Estate

EMPLOYMENT HISTORY

• Salesforce Developer

Description: evelopment & Customization Design and develop custom Salesforce solutions using Apex, Lightning Web Components (LWC), Aura, and Visualforce Create and maintain custom objects, fields, validation rules, flows, process builders, and approval processes Implement business logic using Apex Triggers and Classes following best practices and bulkification ???? Lightning Experience Develop responsive UI using Lightning Web Components (LWC) Integrate LWCs with Apex controllers Optimize UI performance and ensure cross-browser compatibility ???? Data Management Perform data migration and data loading using Data Loader, Import Wizard Write SOQL and SOSL queries for efficient data retrieval Handle large data volumes and governor limits ???? Integrations Implement REST/SOAP integrations with external systems Consume and expose APIs using Apex Web Services Handle authentication methods like OAuth, Named Credentials ???? Security & Access Control Implement profiles, permission sets, roles, sharing rules Ensure field-level security and data access compliance Implement record-level security using OWD and sharing mechanisms ???? Testing & Deployment Write unit test classes with minimum 75% code coverage Perform debugging and error handling Use Change Sets, Salesforce DX, CI/CD tools for deployments ???? Collaboration & Agile Work closely with business analysts, admins, QA, and stakeholders Participate in Agile ceremonies (stand-ups, sprint planning, reviews) Provide production support and bug fixes ???? Best Practices & Maintenance Follow Salesforce coding standards and best practices Refactor legacy code for better performance Monitor and resolve governor limit issues ???? Tools & Technologies Salesforce CRM (Sales, Service, Experience Cloud) Apex, LWC, Aura SOQL, SOSL Salesforce DX Git / Bitbucket REST APIs VS Code

CERTIFICATION

- JavaScript Developer I by Salesforce 2024
- • AI Associate by Salesforce 2024
- Data Cloud Consultant by Salesforce 2024
- Platform Developer I by Salesforce 2023

EDUCATION

- Masters degree in MCA from Chandigarh Univeersity 2023 - 2025
- Bachelors degree in BCA from MDSU 2020 - 2023

LANGUAGES

• English - advanced
