Having 3.5 years of experience in salesforce.com. Experience in implementition of Salesforce.com using Visualforce pages,Apex classes, Triggers, SOQL, SOSL, Custom tabs, Custom objects, Managed package. Extensive experience on working with Scratch orgs, Custom objects, Custom fields, Picklist, Page layouts, Workflow rules, Approval processes, Validation rules, Custom reports and Dashboards. Experience in writing the SOQL and SOSL queries. Good experience with record types, Relationships, Data types, Formula fields,Rollup Summary, Email templates. Good knowledge in implementing Batch apex and Schedule apex interface. Code optimisation with respect to Governor Limits, Order of Execution, Best Practice. Use the sandbox for testing and migrated the code to the deployment instance after testing. Good experience in Salesforce managed package development , creating, uploading, and implementing package across multiple Salesforce orgs, ensuring seamless integration and functionality. Hands- on experience in implementing and integrating AWS S3 services for secure file management and data storage solutions. Salesforce security - Roles, Profiles, Permission sets, Sharing Rules, User Management. Possess a strong ability to quickly adapt to new Applications and Platforms.

INDUSTRIES: FILE STORAGE, Social Media

TECHNICAL SKILLS

• Salesforce	3 years
• sales cloud	3 years
• SOQL	3 years
• Apex	3 years
• Apex Class and Triggers	3 years

PROJECT DETAILS

• FileStorageOptimizationIntegration

Project Description: Designed and implemented a scalable integration between Salesforce and AWS S3 to reduce Salesforce file storage consumption and improve file management efficiency. The solution automates the migration of ContentVersion files (PDF, PNG, JPG, JPEG) from Salesforce to Amazon S3 using Apex batch processing, significantly lowering storage costs while maintaining seamless file accessibility.
Responsibilities: Built a SalesforceAWS STHREE integration to migrate and offload ContentVersion files using Apex batch processes. Implemented secure AWS configuration, Named Credential setup, and generated STHREE file links in Salesforce. Added file validations, compressed duplicate ContentVersions, and created a reporting framework to track migration status. Performed testing, debugging, and documentation to ensure smooth deployment and usability.
Technologies: Apex, Triggers, Asynchronous Apex, Aura, Lwc, Visualforce, Managed package, Schedulers, Queueable Apex, Future methods Sales cloud, REST and SOAP API, Data Migration (via Salesforce inspector,Data loader,etc.) Query language : SOQL, SOSL, SQL Web Technolo
Industry: FILE STORAGE

• Airwaves360AppExchangeApplication

Project Description: This is our AppExchange App.The primary purpose of this app is to allows us to automatically leave a voice message in customer's voicemail inbox, this gives the appearance that we tired to call them personally. It imporoves sales processes and increase efficiency. Record one voicemail/SMS and send it to from 1 to 1 million people at the click of button. We can also arrange a time to send Voicemails /SMS.Email and social media are only requests for attention, but voicemails demand it.
Responsibilities: Gathered detailed business requirements, ensuring a clear understanding of integration needs, and provided thorough documentation. Developed and implemented integration logic using Apex and REST API to enable real-time data synchronization between Salesforce and AIRWAVES, ensuring accurate and timely tasks, campaign members s, and contacts updates. Implemented Asynchronous apex created Batch and Queueable classes for large and complex data handling. Implemented robust error handling and monitoring mechanisms to ensure smooth integration, with alerts and logs for tracking issues and performance. Maintained regular communication with the client, providing updates, gathering feedback, and making necessary adjustments to meet project expectations.
Technologies: Apex, Triggers, Asynchronous Apex, Aura, Lwc, Visualforce, Managed package, Schedulers, Queueable Apex, Future methods Sales cloud, REST and SOAP API, Data Migration (via Salesforce inspector,Data loader,etc.) Query language : SOQL, SOSL, SQL Web Technolo
Industry: Social Media

EDUCATION

• Bachelors degree in BE from L.D. College of Engineering 2019 - 2022

LANGUAGES

• English - native
