Results-driven Blockchain and Full Stack Developer with 4 years of experience in building scalable applications and microservices. Proficient in developing user-friendly interfaces using React.js and integrating Web3 functionalities for blockchain applications. Demonstrated expertise in implementing smart contracts using Solidity and Rust, optimizing database queries, and deploying cloud-based solutions. Skilled in developing decentralized applications on blockchain platforms like Ethereum and Solana. Proven ability to collaborate with cross-functional teams to deliver innovative technical solutions.

INDUSTRIES: Blockchain

TECHNICAL SKILLS

• AWS CI CD AWS EC2 S3 Lambda EBS Cloudwatch Docker	4 years
• Node.js Express.js NestJS Jest Laravel PHP	4 years
• ERC3643 Hardhat Truffle Remix IDE IPFS Chainlink Randomization NFTs Staking & Farming	3 years
• MongoDB MySQL	3 years
• Rust JavaScript Node.js TypeScript PHP Solidity	2 years

SOFT SKILLS

Effective Communication, Team Collaboration, Active Listening, Analytical Thinking, Problem-Solving, Adaptability, Leadership, Time Management, Conflict Resolution, Creativity, Attention to Detail, Work Ethic, Reliability

PROJECT DETAILS

• RWA Tokenization

Project Description: Designed and developed smart contracts using Rust for a decentralized application on the Solana blockchain. Implemented functionality to create assets, including tokens and NFTs, and enabled users to buy and sell them on the secondary market. Developed a React.js frontend to interact with the Solana blockchain, ensuring seamless integration with Rust-based programs and delivering a smooth user experience.
Responsibilities: Developed Rust smart contracts for a decentralized Solana application, enabling token and NFT creation with secure secondary market transactions. Built a React.js frontend integrated with Solana contracts to deliver a seamless and user-friendly experience.
Technologies: Rust, Solana Blockchain, Anchor Framework, Smart Contracts, NFTs, Tokens, React.js, Frontend Integration, Decentralized Applications DApps
Industry: Blockchain

• NFT Marketplace Platform

Project Description: Developed a full-stack application with a React.js frontend, ensuring a seamless user experience for NFT transactions. Integrated Web3 wallet functionality to facilitate user interactions with the marketplace. Collaborated with backend services to display real-time NFT transaction events using Moralis.

Responsibilities: Developed a full-stack NFT marketplace with a React.js frontend to deliver a seamless user experience. Integrated Web3 wallet functionality to enable secure user interactions with the platform. Collaborated with backend services and implemented Moralis to display real-time NFT transaction events accurately.

Technologies: React.js, Web3 Wallet Integration, Moralis, Full-Stack Development, NFT Marketplace, Frontend Development, Real-Time Transaction Handling

Industry: Blockchain

EMPLOYMENT HISTORY

• Full Stack Blockchain Developer

Description: Integrated third-party Quest services using NestJS to enhance user interactions and developed modern UI designs with Web3 functionalities, including wallet connection and staking contract integration. Implemented OAuth for social login functionality and created in-house quest offers along with an admin panel using NestJS and AdminJS. Conducted requirement analysis and translated business needs into technical specifications while collaborating closely with cross-functional teams to deliver innovative technical solutions aligned with business objectives.

EDUCATION

• Bachelors degree in ENTC from SPPU 2017 - 2021

LANGUAGES

• English - intermediate
