+91 9820045154 | hr@augmntx.com

Over 8 years of experience in designing and developing software applications, specializing in backend ASP.NET development with expertise in .NET, ASP.NET, and .NET Core. Proficient in full SDLC methodologies with a strong focus on Agile practices for efficient project execution. Specialized in Angular development with hands-one xperience across Angular 2, 4, 8, 12,15,16 and 17 Expert in database management with SQL Server, leveraging ADO.NET, Dapper, and Entity Framework for efficient CRUD operations and connectivity. Expert in MVC design pattern, enabling the development of scalable and maintainable web applications. Skilled in developing complex ASP.NET web applications with C#, and designing responsive UIs using ASP.NET Web Forms, HTML5, CSS3, JavaScript, TypeScript, jQuery, and Bootstrap. Staying updated with trends and best practices in MongoDB, microservices, .NET Core, and Angular to enhance application architecture and performance. Proficient in using LINQ for efficient SQL Server data access and AJAX for improved application responsiveness and user experience.

INDUSTRIES: Logistics Management System, bitcoin

TECHNICAL SKILLS

• .NET	6 years
• Angular	6 years
• C	6 years
• TypeScript	6 years
• Web API	5 years

SOFT SKILLS

Spoken english, communication skills

PROJECT DETAILS

• Parsl November-2021 - April-2026

Project Description: Develop and manage Role-Based Access Control (RBAC) mechanisms in the ASP.NET Core backend Implement responsive design using HTML5, CSS3, TypeScript, and Bootstrap. Implementing error handling and fault tolerance mechanisms using WCF to ensure the robustness & reliability of the services. Utilize Bootstrap framework to design and develop responsive user interfaces that seamlessly adapt to various screen sizes and devices. Utilize Angular CLI extensively to streamline development workflows and automate project setup & maintenance processes. Use RxJS to efficiently manage asynchronous operations like HTTP requests, user events, or backend API data in Angular apps.
Responsibilities: Develop and manage Role-Based Access Control (RBAC) mechanisms in the ASP.NET Core backend Implement responsive design using HTML5, CSS3, TypeScript, and Bootstrap. Implementing error handling and fault tolerance mechanisms using WCF to ensure the robustness & reliability of the services. Utilize Bootstrap framework to design and develop responsive user interfaces that seamlessly adapt to various screen sizes and devices. Utilize Angular CLI extensively to streamline development workflows and automate project setup & maintenance processes. Use RxJS to efficiently manage asynchronous operations like HTTP requests, user events, or backend API data in Angular apps.

Industry: Logistics Management System

• Gamdom October-2025 - April-2026

Project Description: Collaborated with the Product Manager to analyze business requirements and contribute to the redesign of an existing web application using ASP.NET technologies. Implemented secure communication between TypeScript-based frontend applications and Azure-hosted backend services. Deployed and managed applications on Microsoft Azure, ensuring scalability, automation, and efficient backend operations. Developed and maintained RESTful APIs using C# and ASP.NET Web API, enabling seamless integration with frontend systems. Designed and interacted with SQL Server databases using C# and ADO.NET, ensuring optimized data access and integrity. Ensured high performance, responsiveness, and cross-browser compatibility for web applications using TypeScript. Deployed applications on Azure, demonstrating expertise inscalability and automation for efficient backend operations.
Responsibilities: Develop and maintain RESTful APIs using C#, ASP.NET WebAPI frameworks to support front-end functionality. Design and interact with SQL Server databases using C#, leveraging ADO.NET. Ensure high performance and compatibility across various devices and browsers using TypeScript. Optimize database performance by writing efficient SQL queries and stored procedures. Implement business logic in C# within service layers and backend modules using .NET Core architecture. Implement responsive web UI design techniques to ensure compatibility across various devices & screen sizes.
Technologies: .net, agular,
Industry: bitcoin

EMPLOYMENT HISTORY

• Full Stack Developer December-2021 - April-2026

Description: Over 8 years of experience in designing and developing software applications, specializing in backend ASP.NET development with expertise in .NET, ASP.NET, and .NET Core. ● Proficient in full SDLC methodologies with a strong focus on Agile practices for efficient project execution. ● Specialized in Angular development with hands-one xperience across Angular 2, 4, 8, 12,15,16 and 17 ● Expert in database management with SQL Server, leveraging ADO.NET, Dapper, and Entity Framework for efficient CRUD operations and connectivity. ● Expert in MVC design pattern, enabling the development of scalable and maintainable web applications. ● Skilled in developing complex ASP.NET web applications with C#, and designing responsive UIs using ASP.NET Web Forms, HTML5, CSS3, JavaScript, TypeScript, jQuery, and Bootstrap. ● Staying updated with trends and best practices in MongoDB, microservices, .NET Core, and Angular to enhance application architecture and performance. ● Proficient in using LINQ for efficient SQL Server data access and AJAX for improved application responsiveness and user experience. ● Experience in Utilizing NgRx Dev Tools for time-travel debugging, inspecting state snapshots, tracking actions, and enhancing development productivity. ● Proficient in designing and developing software applications, utilizing HTML, JavaScript, jQuery, and SQL databases for frontend, backend, and database development. ● Skilled in deploying web applications and utilizing Azure cloud services for scalability and efficiency. ● Strong object-oriented design skills and extensive knowledge of core .NET libraries and design patterns, ensuring robust and scalable software solutions. ● Expert in SQL Server, Entity Framework, and ADO.NET for optimized database access in applications. ● Proficient in version management using TFS,TFVC for streamlined collaboration and code management. ● Committed to staying updated with the latest ASP.NET backend advancements for continuous learning and professional growth. ● Experienced in Handling session initiation, signaling, and media streaming for WebRTC-based features using a

EDUCATION

• Bachelors degree in Engineering from SPPU 2016 - 2019

LANGUAGES

• English - advanced
