PROJECT DETAILS

- CERES PROJECT

Project Description: I was given the responsibility of integrating the salesforce email and calendar in Outlook using Einstein Activity Capture at the construction business Ceres. This made it simple for the user to send an email to a specific customer or to the contacts that synchronise Salesforce data with the Outlook platform. Additionally, we can assign events to calendars, making the transfer like a two-way process where users can view events in both the Outlook and the Salesforce calendar Another task was related LWC where we need to count the click in then salesforce Production org so we can find the clicks of the I dividual user. In which also created the report of it so owner can identify the counts.
Responsibilities: Integrating the salesforce email and calendar in Outlook using Einstein Activity Capture at the construction business Ceres.
Technologies: LWC, Apex, E-mail studio
Industry: Manufacturing

• ONQ Project

Project Description: I implemented the project for the bank with the LWC where the task was to move the records of particular object to another object when the work is being completed and also customize the look of the page of the particular Application as per the requirement. Secondly Created the automation through flow builder for the Dates for the auto-population of the field and also the Screen flow automation for the Mode of payment for the selection as per the requirement whether it is the credit card, Debit Card or UPI payment.
Responsibilities: To implement the project, Customize the design and automation.
Technologies: LWC, flow builder, screenflow automation
Industry: Finance

• Property Management

Project Description: Implemented the Project for the Management for the different ongoing projects for different towers so they can provide the whole detail on the ongoing projects the flow builder used for the automation to be displayed on the particular festival. Created the project in such a way to calculate the mortgage and the loan on the particular salary. Implemented the Trigger with handler where the requirement selection of the property whether it is the residential, commercial or Industrial according to another field should get automatically populated.
Responsibilities: to implement and automate the project with flow builder.
Technologies: Apex, flow builder, LWC
Industry: Real Estate
