Software Trainee with 1 Years of experience in SQL, MDM Informatica, Java and Python. To work in a challenging environment where I would be able to utilize my capabilities to the best extend for the success of organization and also attain my career targets in the progress. Informatica developers load and test available data and analyze data warehousing systems and are in charge of resolving any issues that may arise and providing solutions.

INDUSTRIES: Information Technology

TECHNICAL SKILLS

• Informatica MDM	1 years
• Java	1 years
• Python	1 years
• MS SQL	1 years
• Oracle SQL	1 years

SOFT SKILLS

Integrity.Dependability.

PROJECT DETAILS

• Trusted version of data acquired through Informatica MDM.

Project Description: A trust framework has trust scores for source systems, with higher scores indicating the most trusted systems and lower scores indicating lesser trusted systems. MDM uses trust frameworks and survivorship rules to validate merge clusters and produce a golden record of data.

Responsibilities: Involves in Designing and Creating a model in MDM system for the Overall All Project. Created Base Object, Landing and Staging tables as per the project requirement. Deriving parent and child relationship between each table. Also defined Trust and Validation rules for base object. Connection between landing and staging table is given through Mapping using Cleanse function. Data inserted into Oracle SQL Developer using queries. Data loaded into MDM via Batch Viewer. Acquired Matched data set by using Match and Merge rule sets as per end product gained golden copy.

Technologies: MDM Hub Console, Oracle SQL Developer
