I have acquired a diverse skill set that encompasses a wide range of technologies, including Android, Sveltekit, Next.js, Hasura, GraphQL, Python, Flask, Fast API, Digital Ocean, Firebase, .Net API, Android, Java, C, MySql, Postgres, MongoDB, NeonDB, C#, HTML, CSS, JavaScript, jQuery, Crontab, AWS, and, importantly, PHP Laravel. 1. **MERN Stack**: I have extensive experience in building web applications using the MERN (MongoDB, Express.js, React, Node.js) stack, enabling me to create robust and scalable solutions. 2. **PHP Laravel**: I have a strong proficiency in PHP Laravel, a widely used PHP framework known for its elegant syntax and powerful features. This expertise allows me to develop secure and efficient web applications. 3. **Real-Time Analytics**: I have successfully developed a web portal for real-time analytics generation, specifically tailored to monitor market sentiments for stock and derivative markets. This involved designing a polling-less architecture using Sveltekit for the frontend, Python Fast API for the backend, and Postgres as the database. 4. **Stock Market Analysis Tool**: I have contributed to the development of a stock market analysis tool, demonstrating my ability to work on complex projects. This project utilized various technologies and showcased my proficiency in frontend and backend development. 5. **Next.js Expertise**: I have worked on projects like inFiction, a web application built using Next.js, Prisma, and Postgres. This experience highlights my skills in using Next.js for creating efficient and dynamic web applications.

INDUSTRIES: Capital Markets, Entertainment, Food Delivery

TECHNICAL SKILLS

• Express.js	1 years
• React	1 years
• Node.js	1 years
• Hasura	1 years
• FastAPI	1 years
• Python	1 years & 6 months
• .NET Framework	1 years
• Android Studio	6 months
• Nextjs	9 months
• Sveltekit	6 months
• Docker	6 months

SOFT SKILLS

Client Communication, Requirement Gathering, Team Leading, Training Sessions, Client Management

PROJECT DETAILS

• Real-time Analytics Web Portal February-2023 - July-2023

Project Description: Designed a web portal for real-time analytics of market sentiments for stock and derivative markets using Sveltekit, Python Fast API, and PostgreSQL. This project also involved efficient server-sent events for real-time updates.

Responsibilities: Client Communication: I effectively managed communication with the client throughout the project. This included regular discussions, updates, and addressing any queries or concerns. My goal was to ensure the client's vision for the web portal aligned with the development process. Task Distribution: I played a pivotal role in task distribution within the development team. This entailed assessing project requirements, breaking them down into actionable tasks, and assigning them to team members based on their skills and expertise. Effective task distribution was essential for a streamlined development process. Development: Beyond managing client communication and task distribution, I was actively involved in the development of the web portal. This included coding, testing, and implementing various features, ensuring the real-time analytics of market sentiments were efficiently delivered to users. My role was to harmonize these aspects, ensuring that client expectations were met, tasks were executed efficiently, and the web portal's design and development were in line with the project's objectives.

Technologies: Python, FastAPI, Sveltekit

Industry: Capital Markets

• InFiction March-2023 - July-2023

Project Description: Participated in building inFiction, a web platform for writers and the film industry to connect and collaborate.

Responsibilities: Development: I actively participated in the development of the project, contributing to the coding, testing, and overall implementation of the Next.js and Prisma-based web application. This included working on user management, script rating, portfolio management, and other aspects of the application to meet client specifications and industry standards.

Technologies: NextJs

Industry: Entertainment

• Freshbox Admin Portal December-2022 - January-2023

Project Description: Contributed to the development of Freshbox, a React.js, Hasura . The project involved user management and product management.

Responsibilities: Client Communication: I effectively facilitated communication with the client to understand their requirements, gather feedback, and ensure that their vision for the project was realized. This involved regular meetings, updates, and addressing any client queries or concerns. Task Distribution: I played a key role in task distribution among the development team. This included assessing project requirements, breaking them down into actionable tasks, and assigning them to the appropriate team members based on their skills and expertise. Development: I actively participated in the development of the project, contributing to the coding, testing, and overall implementation of the Next.js and Prisma-based web application. This included working on user management, script rating, portfolio management, and other aspects of the application to meet client specifications and industry standards.

Technologies: React, Hasura, PostgresDb

Industry: Food Delivery
