Over 6+ years of experience in Web and mobile application development including Native Mobile Application and Hybrid Mobile Application. I am highly skilled when it comes to coding web applications from scratch. Technical Skills & Expertise: • React + AngularJS, React Native Development • HTML5, CSS3 (CSS preprocessor- Sass, LESS), jQuery, Bootstrap • Backend: Node.js • Database Expertise: MySQL, PostgreSQL, MongoDB, DynamoDB • Third-Party APIs: Facebook, Twitter, Instagram, Parse, Google Map, Google Directions, Google Custom Search, Youtube, Linkedin, Aweber, Yelp, FedEx, UPS, USPS, DHL, Paypal, Stripe, ... - Dev Platforms: iOS, iPhone, iPad, Android, Tablet and Web - Practices: Lean Development, Code review, Unit testing, daily commits - Main focus: Pixel-perfect design and robustness - Development approach: Requirement Analysis, Design, Programming, Testing, Deployment, Support & Maintenance - Communication approach: Collaboration in the pipeline, Daily work updates, Weekly builds.

INDUSTRIES: Food Delivery, Entertainment

TECHNICAL SKILLS

• Node.js	6 years
• React	6 years
• Web3 Js	5 years
• Blockchain	3 years
• React Native	3 years & 6 months

SOFT SKILLS

Problem-solving, Time management, Communication, Critical thinking, Teamwork

PROJECT DETAILS

• Wavebites February-2021 - November-2021

Project Description: WaveBites is a complete food delivery product suite like Uber Eats. Android/iOS apps that are built in react-native and websites (end-user, super admin panel, and restaurant panel) that are built in React.js for the online delivery system. APIs are built in Node.js with an express framework and MongoDB as a database. Added Admin panel to manage the complete ecosystem. It manages system admins, customers, drivers, orders, foods, restaurants, assigning orders to available drivers, etc.
Responsibilities: I was the team leader for this project and actively in commutation with client
Technologies: Node.js, React.js, Next.js, Firebase, React-native, Express.js, GraphQL
Industry: Food Delivery

• Revolt Streaming Mobile Application January-2022 - July-2022

Project Description: Revolt Streaming Mobile Application is a Mobile & web application developed in React Native & React which allows users to stream and download podcasts, movies, and series The app's back end is built using Node.js(v16.14.2) + express. We used MongoDB(v5.0.6) for storing important data The Revolt Summit Application is integrated with a few third-party APIs like: InPlayer for user management, JW Player for video player & content management, CustomerIO & Firebase for push & track notifications. Klaviyo for sending Transactional Emails Additionally, the app is optimised for performance, ensuring smooth streaming and downloads. The app's code is maintained using GitLab, which allows seamless collaboration between developers. It uses Bitrise for Continuous Integration and Continuous Deployment (CI/CD) to streamline the app development and deployment process. It is hosted on cloud servers, which ensure high availability and scalability. The app is also secured using SSL/TLS encryption, ensuring that users' data is protected Overall, Revolt Streaming Application is a robust and scalable React Native application that provides a seamless entertainment experience for users. Its modular design, optimised performance, and third-party integrations make it an ideal choice for any user looking to stream and download podcasts, movies, and series on their mobile device. The Infra of the overall app is Resilience & Reactive. It uses the Kubernetes cluster mechanism to create different nodes to deploy different app services and auto-scale it automatically based on user traffic.
Responsibilities: I was the team leader for this project and actively in commutation with client
Technologies: React Native, React JS, ContentFul, CustomerIO, Node, AWS, Flockler
Industry: Entertainment

EDUCATION

• Bachelors degree in Computer science from GTU 2013 - 2017

LANGUAGES

• English - native
