A passionate Full Stack Developer with 2 years of hands-on experience in creating dynamic and efficient web applications. My proficiency in Java technologies and frameworks like Spring, Spring Boot, and JPA has allowed me to craft robust and scalable server-side solutions. On the front end, I'm well-versed in creating intuitive user interfaces using HTML, CSS, JavaScript, and jQuery.

INDUSTRIES: Information Technology, Publishing

TECHNICAL SKILLS

• Java	3 years
• SQL	3 years
• Spring	2 years
• Spring Boot	2 years
• JavaScript	2 years

SOFT SKILLS

Communication, Teamwork, Problem-solving, Time management

PROJECT DETAILS

• Project Approval — January-2021 - March-2021

Project Description: Project Approval, a dynamic web application designed for the approval and comprehensive management of college project reports It enables students, professors, and department heads with the ability to vigilantly track the progress of projects submitted by students It uses role-based authentication to provide access and privileges for a diverse range of users, including students, faculty members, department heads, and administrators.
Responsibilities: Maintain the backend and the database of the application
Technologies: Python, Django
Industry: Information Technology

• Blog

Project Description: Built real-time REST APIs for a Blogging Application, enabling users to create, update, and delete posts through these APIs. Empowers users with the dual capability to add or delete comments on posts and seamlessly categorize the content according to their specific categories Rigorously tested and streamlined the documentation of APIs using tools like Postman and Swagger
Responsibilities: Maintain the backend and the database of the application
Technologies: Java, Spring Boot
Industry: Publishing

EMPLOYMENT HISTORY

• Systems Engineer August-2021 - November-2023

Description: • Successfully developed and maintained the B2B platform 'Tata Nexarc,' delivering trusted and cost-effective solutions to drive growth for MSMEs • Established collaborative partnerships with cross-functional teams, product managers, and stakeholders to gather requirements, and translate them into precise technical specifications which led to generating process efficiency/improvement. • Designed, engineered, and managed robust full-stack applications utilizing Java, Spring Boot, Spring MVC, JavaScript, jQuery, and MySQL • Partnered with the engineering team to plan and design the conversion of a legacy monolithic Java application to a Spring Boot based application using Java 8 and Spring Boot 2.7. • Built web services with Java and Spring Boot, and UI using FTL that were used by the customer-facing application that increased the page speed by 30%. • Successfully conducted API design and development of RESTful Services, enhancing operations of the enterprise product in the business. • Innovated a unique payment link feature, resulting in a 20% increase in non-logged-in user payments by simplifying the payment process through link sharing. • Streamlined local development process by creating documentation of implementation details and process reducing onboarding of new members by 40%. • Played a pivotal role in code reviews, driving improvements that raised code quality and ensured long-term maintainability. Actively participated in crafting robust and optimized data models to enhance application performance. ■ Maintained the code quality by fixing detected bugs, vulnerabilities and code smell by SonarQube. • Demonstrated a track record of swiftly addressing production issues, leading to improved product performance and reliability. • Promoted to the position of Modul lead within 1.6 years due to strong performance, mentored and guided a team of 3 people.

EDUCATION

• Bachelors degree in Computer Science from Acropolis Institute Of Technology And Research 2017 - 2021

LANGUAGES

• English - advanced
