A Developer is capable of building, customizing, and designing Mobile Applications, having experience of more than 5 years. I have developed a wide range of mobile apps for various platforms including Android, iOS, and Flutter apps. I am proficient in multiple programming languages such as Java, Kotlin, and Dart Why hire me? □ Detail & Solution Oriented: With my expertise in UI/UX I always focus on every single detail which can improve the overall user experience. My goal is always to find solutions and get things done. I don't make excuses after the project discussion. □ Minimum Turn Around Time: I quickly react to changes and issues faced to maintain the agility of development. □ Latest Development Practices: I Only follow standard development practices such as clean architecture, MVVM(Model View View-Model), DI with HILT, and GetX. This design pattern makes the app easy to manage, easy to test, and easy to expand it also makes code a bit easy to read so that other developers can continue working on the same app without any confusion. ???? Stack: - Java - Kotlin - Firebase - REST - XML - MVC, MVVM, Clean Architecture - Data Binding, View Binding - SQL Databases - Dart - IoT - In-app purchases, PayPal, Braintree, Stripe, etc. payment integration. - Dependency Injection - Dagger/Koin. - Sensors, Bluetooth, Bluetooth LE. - Text to speech. - Version control. - Git, Bitbucket - Trello, Jira, Slack, and Asana project management tool
