• Ruby on Rails	10 years
• Ruby	10 years
• MySQL	10 years
• PostgreSQL	10 years
• HTML & CSS	10 years
• Elasticsearch	10 years
• JavaScript	10 years
• Docker	10 years
• jQuery	10 years
• CI & CD	10 years
• Vue.js	10 years
• Github	10 years
• AWS	10 years
• React	10 years
• Bootstrap	10 years
• Nginx	10 years
• RSpec	10 years
• redis	10 years
• Microservices	10 years
• API	10 years

PROJECT DETAILS

• Dwellworks (dwellworks.com).

Project Description: We make relocation management easier by coordinating and delivering a suite of solutions when and where our clients need us. Our services are at the core of relocation success for employees, their families and for companies with workforce mobility needs around the world.
Responsibilities: My contribution to this project is to convert an existing product into a SASS product by integrating subscription payments into it, creating a limiting and permission system into it and creating an embedded marketplace of paid job boards using 3rd party APIs. I also lead projects to improve quality of code by improving test coverage and using standard practices for code and also lead a project to improve speed of our API's and website. • My current role is to code, review peer code and enforce code quality. • Debug and fix bugs on the live website. • Mentor junior developers and actively resolve and unblock other developers' issues. • Lead Backend Team of 15 Developers. • Onboard and Mentor junior developers, participate in interviews.
Technologies: ROR
Industry: Ecommerce

• Sanofi (www.verifycardace.com/)

Project Description: Sanofi (www.verifycardace.com/) multinational pharmaceutical and healthcare company
Responsibilities: My contributions on this project is to update UI, create customized promotions, create a new recommendation system, integrate various marketing tools and api's, build multiple types of pdf related to orders, create csv reports, create api's so that project can be moved to react, and integrated reactjs and use it to create cart and checkout flow and other components. • My role was to code, review peer code and enforce code quality. • Debug and fix bugs on the live website. • Mentor junior developers and actively resolve and unblock other developers' issues. • Took active part in DB and server architecture.
Technologies: ROR
Industry: Healthcare

• Surya (qrcode.surya.in)

Project Description: Surya (qrcode.surya.in)
Responsibilities: Worked as a sole backend developer and server architect along with a team of Frontend developers. • My main contribution is to set up server architecture on AWS . That includes setting up scaling servers and db redundancy, and end to end encryption. • Other contributions are to fix the rails based admin side of the project, api and use aws .
Technologies: ROR
Industry: Ecommerce

• Gulf (check.gulfoilindia.com)

Project Description: Gulf (check.gulfoilindia.com)
Responsibilities: My contribution in this project is to create dynamic product search and catalog using searchspring api and js, implement store credits, micro-service based service to sync data between online shop and inhouse inventory system, later on created api's on shop so that inventory can communicate with shop directly and vice versa. • Later in the project my responsibilities expanded to code reviews, server maintenance and overseeing team members.
Technologies: ROR
Industry: Ecommerce

• VTAPP

Project Description: VTAPP Inhouse app to train and track new recruits, using rails, bootstrap and jquery.
Responsibilities: • I am the sole developer for this and this project is part of my training itself. • I created the whole website from scratch including db architecture, data migration from the previous app, test cases using rspec, create progress tracking of trainee and reviewers, role based access control.
Technologies: rails, bootstrap and jquery.
Industry: Software and Platforms

EDUCATION

• Masters degree in Computer applications from RGPV 2010 - 2013

LANGUAGES

• English - advanced
