Worked as a Mobile Apps Developer, done 5+ projects using React native + Redux. Managing large and complex or multiple components with smooth implementation and testing of application. Delivering and implementing the project as per schedule milestones. Design and Developed Reusable components. And I have done 5+ React Native Apps for which I have created UI as well And managed data using Redux and Redux-thunk and also developed apps using context API. I have developed most of the Apps in the Functional component and few Apps in the Class component. Worked closely with the project management and marketing team to completely de????ine speci????ications to help ensure project acceptance.

INDUSTRIES: Healthcare, Education

TECHNICAL SKILLS

• React Native	3 years & 5 months
• Redux	3 years & 5 months
• JavaScript	3 years & 5 months
• Firebase	3 years & 5 months
• Postman	3 years & 5 months
• Responsive Web Design	3 years & 5 months
• TypeScript	6 months

SOFT SKILLS

Communication, Teamwork, Time management, Problem-solving, leadership

PROJECT DETAILS

• HealthCare domain

Project Description: This App is to guide the users according to their health condition and needs. This app will create programs for the users based on condition in which user can get diet instructions & exercise instructions. In this app I worked on Breathing module In which users can do breathing exercise programs according to the guided and non-guided. In Guided session user can follow the instructions watching video in it. And for the non-guided session user can follow the audio and vibration to do the breathing exercise. This app is in TypeScript. I used GraphQL mutations and queries for fetching data.
Responsibilities: Jr. React Native Developer Development and Task Assignment
Technologies: React Native
Industry: Healthcare

• BeSomeone

Project Description: BeSomeone is an educational app where students can develop their real world skills and also they can track them and they could learn new skills and explore the new activities by feed section and share the feed with their friends using promote in feed section. And they can track all the skills in Talent section. By Using, Tracker section they can add new school activities and personal activities. There is a onetime feature called self-evaluation in which student can evaluate them self. There is a Reward feature when student cross the talent level then it appears. We have used Firebase library for achieving Push notifications and for the deep linking we have used AppsFlyer SDK. For Social authentication we have used apple, google and Facebook authentication libraries. For developing this application in front-end we have used React-Native and Python for the rest APIs.
Responsibilities: Understanding Project Requirement and Defining Technical Guidelines
Technologies: React Native
Industry: Education

EMPLOYMENT HISTORY

• Sr.React Native developer

Description: Sr. React Native developer

EDUCATION

• Bachelors degree in CS from GTU 2015 - 2019

LANGUAGES

• English - advanced
