TECHNICAL SKILLS

• ROR	8 years
• Docker	3 years
• AWS	2 years
• JavaScript	2 years
• Python	1 years

PROJECT DETAILS

• Project Title: DAP (Digital assistant pro) December-2020 - September-2023

Project Description: DAP: Digital Assistant Prois a plugin which supports shopify platform for providing license key and files for digital product. It also involves electronically transferring data and funds between two or more parties. Simply put, it is online shopping as we commonly know it. small, together to transact and collaborate with each other. We help suppliers increase visibility and efficiency in order to expand sales and close deals faster.

Responsibilities: We help buyers buy smarter in ways that maximize savings and reduce risks. And we provide a powerful platform that can be customized and branded for your business.

Technologies: ROR, PostgreSQL, OOPs

Industry: Information Technology

• jvbwellness

Project Description: The JVB Health & Wellness Program is based on what we call The 8 Pillars of Health & Well Being: Nutrition, Exercise, Movement, Sleep, Stress Management, TimeManagement, Positivity, and Accountability. The program works for anybody that follows it, from competitive athletes to people that have never exercised before

Responsibilities: Deployment, automation, management, and maintenance of AWS cloud-based production system. Ensuring availability, performance, security, and scalability of AWS production systems. Evaluation of new technology alternatives and vendor products. System troubleshooting and problem resolution across various application domains and platforms. Pre-production acceptance testing for quality assurance.. Provision of critical system security by leveraging best practices and prolific cloud security solutions. Definition and deployment of systems for metrics, logging, and monitoring on AWS platform. Designing, maintenance and management of tools for automation of different operational processes

Technologies: Python, Ror, Rest API, PostgreSQ

Industry: Information Technology

• e-Purchasing Network (ePN)

Project Description: E-Purchasing Network is a procurement platform that helps companies buy and sell more efficiently. Our powerful software allows you to build a purchasing portal that fits your brand in a matter of minutes. We help our customers cut costs, grow revenue, reduce risks, and increase customer satisfaction. EPN brings all companies, big and small, together to transact and collaborate with each other. We help suppliers increase visibility and efficiency in order to expand sales and close deals faster. We help buyers buy smarter in ways that maximize savings and reduce risks. And we provide a powerful platform that can be customized and branded for your business.

Responsibilities: Provide ongoing application support and troubleshooting. Used object-oriented principles for class development to streamline efficiency and ensure ascalable and reusable architecture. Ensured that the software is embedded as per the requirements of the clients and as per the firm’s need. Developed the unit test-cases using Rspec to make the software function properly. Supporting in QA testing. Involved in deploying the application to Elastic-Beanstalk(eb-instance) using AWS. Attending daily status meeting with Client.

Technologies: ROR, OOPS, PostgreSQL

Industry: Information Technology
