Software Developer with 1 Years of experience in AWS Cloud Engineer and SQL. To secure a position in a company where I can use my skills and abilities to make a contribution to the organization. A challenging position in an innovative and forward-thinking company that will allow me to utilize my skills and experience in a new and exciting way. An cloud engineer is responsible for building, designing, and maintaining cloud databases. Their role can be divided into three specialties: cloud design, development, and administration. You should have skills such as programming, data security, and storage.

INDUSTRIES: Information Technology

TECHNICAL SKILLS

• Amazon Web Services	1 years
• Python	1 years
• GitHub	1 years
• Linux	1 years
• MS SQL	1 years

SOFT SKILLS

Teamwork, Problem solving

PROJECT DETAILS

• Orchestrate Amazon Redshift-Based ETL workflows with AWS Step Functions and AWS Glue.

Project Description: Its fully managed, petabyte-scale data warehouse service in the cloud. Amazon Redshift Serverless lets you access and analyze data without all of the configurations of a provisioned data warehouse.

Responsibilities: Designed and implemented ETL workflows using AWS Step Functions and AWS Glue to extract, transform, and load data into Amazon Redshift. Configured AWS Glue to automate the ETL process and ensure efficient and accurate data transfers. Monitored and optimized ETL workflows to ensure efficient performance and high-quality data delivery. Maintained and updated ETL workflows to accommodate changes in data sources and address any issues or bugs. Documented ETL workflows and ensured they were properly backed up and recoverable in the event of a disaster. Collaborated with cross-functional teams to identify and resolve issues and improve the overall ETL process. Experience with AWS technologies such as Amazon S3, Amazon EC2, and Amazon Redshift. Strong understanding of data warehousing concepts and ETL best practices. Ability to troubleshoot and resolve issues with AWS Glue and Amazon Redshift. Knowledge of programming languages such as Python and SQL for data transformations and data retrieval.

Technologies: Aws Management Console, Python, SQL.
