As an ambitious learner and hardworking individual, always an energetic and eager to learn new skills and have experience in working as a part of team and individually. Bringing 5+ years of Software development and management experience , more into Backend development & implemented the latest technologies

INDUSTRIES: Ecommerce, Healthcare

TECHNICAL SKILLS

• Spring Boot	5 years
• Spring Framework	5 years
• Angular	5 years
• React	5 years
• Node.js	5 years
• AWS	3 years
• NoSQL	3 years

PROJECT DETAILS

• E-Commerce Platform — June-2020 - June-2022

Project Description: As a backend developer, I have experience working on an e-commerce platform similar to Amazon.
Responsibilities: My responsibilities included developing and maintaining two critical modules: EWB Generation Module: I worked on creating a system for Electronic Waybill (EWB) generation, which is essential for tracking and managing shipments. This involved generating EWBs for orders, secure storage of EWB information, real-time tracking updates, and providing EWB-related data to customers and shipping partners. Order Module: I also played a key role in the order module, which is central to any e commerce platform. My work encompassed customer order placement, inventory management, payment processing, order tracking, communication with shipping services, and handling returns and refunds.
Technologies: Spring Boot, Java 11, Microservice Architecture, API Integraion, JPA
Industry: Ecommerce

• Ksatria E-Hospital — June-2022 - December-2023

Project Description: Ksatria E-Hospital is a complete hospital information system (HIS) which can be installed in various upgradable configurations Hospital Finance, PAS (Patient Information System), Billing, Polyclinic, or as a complete HIS with an Electronic Medical Record (EMR). I have been working on Billing and Pharmacy Module, along with some minor changes in other modules, created Import Export of various data as well as Analytics reports through Jasper.
Responsibilities: Worked to implement solution described in Project description.
Technologies: Spring Boot, Java 11, Angular 11,PostgreSQL, GraphQL, NGRx, JasperReports.
Industry: Healthcare

EMPLOYMENT HISTORY

• Senior Software Developer June-2020 - January-2024

Description: Developed full-stack web applications which processed, analyzed, and rendered data visually. Liaised with back end developers, front end developers, quality assurance testers, and CTO as needed. Managed time-sensitive updates, including content changes and database upgrades. Planned, wrote, and debugged web applications and software with complete accuracy. Developed app integration with REST / SOAP and other APIs for Google Maps, social media logins, payment processors, and other services. Maximized applications' efficiency, data quality, scope, operability, and flexibility. Reviewed code and debugged errors to improve performance. Successfully developed and implemented critical modules for a hospital management system, significantly enhancing operational efficiency. Demonstrated versatility and technical expertise by developing custom Lambda functions and integrating them effectively into the existing system. Played a lead role in the development of a new healthcare project, introducing innovative solutions for appointment and test booking, as well as patient data management. Effectively implemented advanced security measures using AWS Cognito, ensuring robust data protection and user authentication.

EDUCATION

• Bachelors degree in Computer Science Engineering from CTE Udaipur 2016 - 2020

LANGUAGES

• English - advanced
