| | |
|---|---|
| • JavaScript | 10 years & 1 months |
| • .Net Core | 8 years & 1 months |
| • .NET Framework | 8 years |
| • C# | 6 years & 6 months |
| • Asp.Net | 6 years & 7 months |
| • design patterns | 6 years |
| • SQL Server | 5 years & 1 months |
| • Node.js | 5 years & 3 months |
| • sap hana | 3 years |
| • React | 3 years & 6 months |
| • TypeScript | 3 years & 1 months |
| • Azure | 3 years & 1 months |
| • PHP | 3 years & 1 months |
| • Docker | 2 years |
| • Architecture | 2 years |

## PROJECT DETAILS

• Whiz — January-2022 - September-2023

Project Description: Conduct technical laboratory functions such as new features, process orchestration and investigate bug. Hands-on backend product development with capabilities Azure, azure functions, pipelines, SQL, ETC

Responsibilities: ■ Complete tasks tracked by Azure devops. ■ Create backend API services based on microservices architecture to support mobile and web clients. ■ Create scripts to run database migrations according to technical requirements. ■ Have a clean repository by creating branch-per-feature and reviewing team code. ■ Analyze the use cases to ensure high quality and best approach for the solution. ■ Implementation of several third-party services and dependencies.

Technologies: Net Core, Node.js, React, TypeScript, Angular, SQL, NoSQL, Docker, AWS, Azure, Microservices, SOLID, Design patterns.

Industry: Healthcare

• Asseco May-2021 - December-2021

Project Description: Project: Backend API services and web ERP Project Description: ERP Support and new features

Responsibilities: ■ Estimate, design, implement(customize) and test ERP software requirements of customers in Europe and America ■ Implement customizations in www.APplus-ERP.com ■ Rollout of implemented solutions in cooperation with the project team. ■ Data migrations from 3rd party systems to APplus-ERP ■ Validate concepts (blue-blooks) and recommend consultants the best possible solutions

Technologies: Java (Backend), C#, Node Js, .net framework, SQL Server, SOAP, REST, XML, ASP.net Core, Azure, swagger, Microservices, SOLID, Design patterns, JavaScript, Typescript, ASP.NET, React JS, and HTML5.

Industry: Finance

## EMPLOYMENT HISTORY

• Sr. Full Stack Developer July-2018 - May-2021

Description: Technology Stack: ABAP, SAP FIORI, Node Js, API REST, SAP UI5(JavaScript and HTML5) for SAP HANA, ODATA, SAP Fiori Elements, SAP HANA database Objects, Smart Forms, and Smart Phone. Project: Farm Project Description: ■ Creation of customized applications for a poultry company in Guatemala, these applications were tailored to meticulously control the process of raising poultry and pigs. These were developed with ABAP, SAP FIORI, SAP UI5(Javascript) for SAP HANA. ■ Creation of an online scale to measure several times the weight of the birds and keep better control of how many portions to give the birds. These were developed with ABAP, SAP FIORI, SAP UI5(Javascript) for SAP HANA. ■ Applications to improve control in brewing companies in Central America. These were developed with ABAP, SAP FIORI, SAP UI5(Javascript) for SAP HANA.

• Sr. Full Stack Developer February-2018 - July-2018

Combex IM

Description: Technology Stack: Net Framework, Asp.Net MVC, jQuery, Angular, Vue Js, Node Js, Web Services, Git, SQL Server, Java, Oracle, SVN and XML. Project: Development of Back-end, Front-end and APIs for the logistics industry, new and existing applications. Project Description: Collaborated in the design and creation of a several web systems for the company ■ Complete tasks tracked by JIRA. ■ Support for the existing import and export application in ORACLE, .NET, and C# ■ Application for some departments to visualize the route of the products that enter the warehouse with Oracle and C#.

• Sr. Full Stack Developer October-2015 - January-2018

Integra

Description: Technology Stack: Net Framework, Asp.Net MVC, jQuery, Angular, Web Service, Git, SQL Server, REST API, Oracle, team foundation, JavaScript and XML. Project: Payroll app, external services with SAP Project Description: Lead the software development team and ensure that projects are completed efficiently and effectively. Involved in designing, developing, and testing software applications while maintaining high-quality coding standards. Additionally, you will be responsible for identifying and implementing best practices for software development, managing the team's workflow, and coaching and mentoring junior developers. Your expertise in programming languages, tools, and frameworks will play a crucial role in the success of the projects. You may also collaborate with other teams such as product managers, designers, and quality assurance professionals to deliver high-quality software solutions that meet the needs of the end-users.

• Software Developer January-2015 - October-2015

Homeland

Description: Technology Stack: PHP, Javascript, MySQL, Jquery. Project: Creation of Reports for clients in Guatemala. Project Description: • Support in the web pages of the company with php, mysql, javascript and jquery. • Development of new functionalities on the company's customer page • Support for websites of schools, universities and other local businesses • Development of new functionalities in schools, universities, logistics companies, etc.

• PHP Web Developer April-2015 - September-2015

FLAAR Mesoamerica

Description: Technology Stack: PHP, Javascript, CSS, MySQL, Jquery. Project Description: • Development and Maintenance of Applications in PHP, Javascript, JQUERY, CSS and MYSQL. • Support the Organization's content creation platforms.

• Technical Support Agent - Developer July-2013 - December-2014

Academia de Lenguas Mayas

Description: Technology Stack: Windows Server, Linux, PHP, MYSQL, SQLServer and VB.NET Project: Preventive and Corrective Maintenance of hardware and software equipment, repair of computers, installation of operating systems (Windows, Linux), installation of basic programs in computer equipment, monthly security backups, Windows Server virtualization. Project Description: • Administration of Windows Server 2008 (Active Directory Users), structured cabling with UTP cable in the different offices of the headquarters, administration and periodic update of the web page created with the content manager (JOOMLA), monthly control of the Equipment Inventory of computation and spare parts, writing of documents (Offices, Circulars, Technical Reports), solution of the different network problems at • Headquarters. • Staff training (not computer) for the proper use of computer equipment. • Monthly report of Activities and Results to the immediate manager and Human Resources. • Maintenance of internal applications in PHP, MYSQL, SQLServer and VB.NET

## EDUCATION

• Bachelors degree in systems engineer from Mariano Galvez University 2012 - 2019

## LANGUAGES

• English - advanced
