A seasoned Senior Mobile App Developer with seven years of specialized expertise in React Native development. Their Bachelor of Engineering background fuels a deep understanding of cutting-edge industry techniques and trends. Proficient in various computer languages, operating systems, and databases, Abhishek excels in state management using Redux and context API. They craft elegant, user-centric mobile interfaces and seamlessly integrate backend APIs for robust, data-driven applications. Git and GitHub are among their adeptly handled tools. Beyond coding, he's multilingual, fluent in English and Hindi, and committed to driving impactful innovations in the dynamic IT landscape.

INDUSTRIES: FinTech, Home Services, Healthcare, Enterprise Software, Construction, Social Media, Ecommerce

TECHNICAL SKILLS

• React Redux	6 years & 3 months
• JavaScript	2 years & 4 months
• JSON	2 years & 6 months
• TypeScript	1 years & 1 months
• GraphQL	1 years & 5 months

SOFT SKILLS

Communication, Critical thinking, Problem-solving

PROJECT DETAILS

• Go Green — September-2017 - September-2018

Project Description: Go green is a Financial App and it's maintain a user monthly budget and mange the expenses. It aims at reducing paper usage and saving the tree.
Responsibilities: Worked on UI development & API integration Actively participated in code reviews, offering constructive feedback and suggestions to improve code quality and maintainability
Technologies: React Native, Redux
Industry: FinTech

• Curated Logistics — October-2018 - October-2019

Project Description: Curated is basically a service provider app that provides services to users on the behalf of some uses like (plumbing, mechanic, pest control, pest, handyman, etc). so users can book its services on the behalf of its requirement and this services are provided by our service provider.
Responsibilities: Profile and optimize the app's performance, identifying and resolving bottlenecks, memory leaks, and other issues. Employ techniques like code splitting, lazy loading, and caching to improve app responsiveness. Troubleshooting and debugging issues that arise during development and testing. Keeping the application up to date with the latest versions of React Native and other dependencies. Applying updates and patches to address security vulnerabilities and compatibility issues.
Technologies: React Native, Typescript, Graphql
Industry: Home Services

• Securra July-2023 - November-2023

Project Description: Securra is for wellness user can enroll in the wellness programs, Can add their heart rate and blood pressure and height & Weight and etc in the app to track the activity also user can take appointment with the doctor and have a video call with doctor and take prescription online itself and also can chat with the doctor

Responsibilities: Translating design mockups and wireframes into actual app interfaces. Implementing responsive designs and ensuring consistent UI/UX across different devices and screen sizes. Integrating with various backend services and APIs, fetching and displaying data in the app, and handling API responses. Implementing navigation between different screens and sections of the application.

Technologies: React Native, Redux, Typescript

Industry: Healthcare

• MyQuad November-2019 - November-2020

Project Description: MyQuad is like User will signup in the app then he will be getting a QR code for their contact details info so he can share their QR with anyone so the other user can scan and save their contacts, also user can create a business QR also and share the business QR so the other user can see the business address and contact no and many more details.

Responsibilities: Translated design mockups into responsive and interactive user interfaces, ensuring a consistent look and feel across different devices and platforms. Implemented state management using Redux, orchestrating complex data flows and effectively managing app state for optimal performance

Technologies: React Native, Redux,Jest

Industry: Enterprise Software

• ClickIPO January-2022 - June-2022

Project Description: Get access to IPO and Secondary Offerings, commission free. ClickIPO allowseveryday/individual investors to discover, follow, share and even participate in public offerings using a supported brokrage account

Responsibilities: Creating reusable and modular UI components that can be used throughout the application. This promotes code reusability and makes maintenance easier. Implementing state management solutions such as React's built-in state management or third-party libraries like Redux or MobX to manage the application's state effectively. Identifying performance bottlenecks and optimizing the application for smoother user experience. This could involve reducing rendering times, optimizing images, and implementing lazy loading. Worked on UI development & API integration

Technologies: Reactnative, Redux, Json

Industry: FinTech

• ClickIt App November-2023 - January-2024

Project Description: ClickIt is based on construction materials you can purchase the construction materials and track you delivery status and also reorder and complaints about the products it damaged

Responsibilities: 1. Implement new features in the app and also upgrade the UI and bug fixes in the mobile app. 2. Create the PR for new feature and bug fixes 3. Switched the Class component to function component in Web app and updated the packages 4. Fixed the Bugs after upgradation 5. Make the build for testing from Heroku

Technologies: ReactJs & React Native (Web and Mobile both)

Industry: Construction

• InstaV9 December-2020 - December-2021

Project Description: InstaV9 is like user login in the app will able to see some task on the Home Screen like doFollow, doComment or doLike, etc then user can click on any task and can complete that task by commenting or following to that particular user and then user will get some approve points and then after 100 points user can add their profile so that another users will get that task so that user can increase their followers and all

Responsibilities: Worked on UI development & API integrationSuccessfully integrated applications with backend APIs, consistently delivering seamless data synchronization and real-time updates to users. Conducted comprehensive testing and debugging to identify and resolve issues, resulting in a 20% reduction in app crashes and improved user satisfaction. Collaborated with QA teams to ensure thorough testing of features and functionalities, addressing issues promptly and delivering high-quality applications.

Technologies: React Native, Redux, javascript

Industry: Social Media

• Dailywale September-2016 - December-2016

Project Description: Dailywale arranges the daily need items in a single package on best available prices that to on-time.Milk, Organic Cow Milk, Bread, Curd, Flowers, Magazine and more.

Responsibilities: Actively participated in code reviews, offering constructive feedback and suggestions to improve code quality and maintainability

Technologies: React Native, Typescript

Industry: Ecommerce

• 316 App January-2017 - August-2017

Project Description: Bank 316 is netbanking app and there is trading feature for invest money on shares and in mutual funds.

Responsibilities: Worked on UI development & API integrationActively participated in code reviews, offering constructive feedback and suggestions to improve code quality and maintainability

Technologies: React Native, Redux, Json, Graphql

Industry: FinTech

EMPLOYMENT HISTORY

• Senior React native Developer August-2016 - January-2024

Description: ● Domain knowledge with comprehensive understanding and practical knowledge of various Computer Languages, Operating Systems and Databases. ● Strong grasp of state management concepts using Redux and context API. Proficient in architecting robust data flows and state synchronization across components to maintain a consistent application state. ● Demonstrated proficiency in building complex mobile applications using React Native framework. Expertise in crafting elegant user interfaces and implementing interactive features that align with design specifications and user expectations. ● Expertise in integrating mobile applications with backend APIs and using RESTful service. Proven track record of effectively fetching, managing, and displaying data from server-side sources. ● Experience with Git and GitHub

EDUCATION

• Bachelors degree in Computer Science from CGPA 2012 - 2016

LANGUAGES

• English - advanced
