Experience in software design and development, I'm proficient in an array of technologies like ReactJS, React Native, Redux, AngularJS, Angular2-14, Bootstrap, CSS3, HTML5, JQuery, JavaScript, Ajax, and Firebase. I excel in leveraging OOP skills to create dynamic and user-friendly interfaces, adept at consuming Restful Web Services and updating HTML functionality using JavaScript and jQuery. My expertise extends to resolving compatibility issues across various browsers like IE, Mozilla Firefox, and Chrome. I specialize in UI/UX design using HTML, XHTML, AngularJS, and JavaScript, ensuring seamless user experiences. Additionally, I possess robust database skills, working fluently with MS SQL, Oracle, and MySQL, and have experience handling big data.

INDUSTRIES: FinTech, Spiritual, Ecommerce, Communication, Community, Agricultural

TECHNICAL SKILLS

• React	6 years & 3 months
• Node.js	4 years & 2 months
• AWS	2 years & 2 months
• TypeScript	2 years & 4 months
• JavaScript	2 years & 3 months

PROJECT DETAILS

• ClickIPO

Project Description: : ClickIPO addresses the existing information gap in the IPO market among retail investors and empowers them to discover, monitor, share, and potentially participate in public offerings through a supported brokerage account
Responsibilities: ● Integrate NodeJS for server-side rendering and backend logic, creating a unified and performant application. ● Utilize Redux for state management, ensuring efficient handling of application states and data flow. ● Design and implement the visual aspects of the ClickIPO platform using ReactJS and NextJS for web applications and React Native for mobile applications.
Technologies: ReactJS, NodeJS, NextJS, React Native, Typescript, Redux, Nodejs, REST APIs, AWS Elasticache, PostgreSQL
Industry: FinTech

• ISKM

Project Description: The ISKM app is a Mandir Trust app from srikrishnamandir.org, which offers a range of services such as Live Darshan, Donations, Events, Offerings, and Eshop.
Responsibilities: ● Api creation ● Managing Database ● Bug fixes and new integration
Technologies: RractJS, MongoDB, Nodejs
Industry: Spiritual
Link: https://srikrishnamandir.org/

• Stylecabbie

Project Description: : StyleCabbie is a "Made-in-India" enterprise catering to the personalized goods market, available in a creative e-tailing atmosphere for the masses.
Responsibilities: ● Designing and building APIs that allow communication between different parts of a web application. ● This includes defining routes, request handling, and response generation. ● Implement user authentication and authorization mechanisms for secure access to resources. ● Optimize code execution and minimize latency to ensure efficient application performance. ● Implement caching strategies and manage data to enhance response times.
Technologies: ReactJS, Redux, Nextjs
Industry: Ecommerce
Link: https://www.stylecabbie.com/

• Bizchat

Project Description: BizChat is a communication and collaboration platform designed for the entire organization, regardless of its size. It facilitates modernization and simplification of communication for teams and organizations, bringing them together around a single communication tool.
Responsibilities: • Create the overall architecture and design of the mobile application. • Integrate the mobile app with other components of the BizChat platform, such as web application. • Assist in the deployment process, ensuring that the mobile app meets the requirements of app stores and is ready for distribution.
Technologies: React Native
Industry: Communication

• Hubbers

Project Description: Hubbers is a community of creators who conceive, build, manufacture, and market inventive or conventional products utilizing the strength of the crowd. With Hubbers, anyone can transform a creative product concept into a lucrative business with limited resources.
Responsibilities: • Design and implement the visual aspects of the Hubbers platform, ensuring a clean and user-friendly interface. • Develop responsive and cross-browser-compatible UI components to provide a consistent experience across different devices. • Integrate with backend APIs to fetch and update data, enabling real-time interactions on the platform.
Technologies: ReactJS
Industry: Community
Link: https://hubbers.io/

• Aquagallery

Project Description: Aquagallery provides a personalized lighting design service, crafting each light in their collection according to the customer's specifications in their atelier, using their team of skilled artisans.
Responsibilities: • Utilize ReactJS to build interactive and dynamic user interfaces. • Implement state management using Redux to efficiently handle and update the application state• Design and implement the visual aspects of the Aquagallery platform using ReactJS. • Ensure that the UI is aesthetically pleasing, user-friendly, and aligns with the brand image.
Technologies: ReactJS ,Redux
Industry: Ecommerce
Link: https://aquagallery.com/

• Info India

Project Description: Info India is a listing website where users can add business details and generate leads by registering with Info India verified. Membership plans are available to fit specific business needs.
Responsibilities: ● Use ReactJS to build interactive and dynamic user interfaces for adding and viewing business details on the platform. ● Implement forms for users to easily add business details, ensuring a smooth and intuitive data entry process. ● Design and implement the visual aspects of the Info India website using ReactJS.
Technologies: ReactJS
Industry: Ecommerce

• Tillable

Project Description: Tillable is a platform that connects landowners and growers through a marketplace. It offers a one-stop solution that provides price discovery, new land access, and information management for all parties in an easy-to-use platform.
Responsibilities: ● Develop UI components for user profiles, registration, and authentication, ensuring a secure and personalized experience for each user. ● Integrate UI components that facilitate price discovery for both landowners and growers, providing transparent and efficient pricing information.
Technologies: ReactJS
Industry: Agricultural
