With over a decade of experience in the tech domain, I have honed my skills in coding, team building, and mentoring. As the Founder and CTO of Default, I spearheaded a multidisciplinary team to drive continuous innovation and business growth, achieving a remarkable $1M ARR from inception. My journey also includes leading Bowstring Studio, where I expanded our capabilities to web tools using low-code technologies, partnering with leading brands like Cisco and Uber. My expertise lies in: - Strategic Team Building: Cultivated high-performance teams, enhancing developer utilization by 20%. - Technical Leadership: Developed plug-n-play modules and starter kits, accelerating product delivery by 25%. - Innovative Problem Solving: Authored an 'Engineering Bible' to streamline best practices, significantly boosting productivity.

INDUSTRIES: Healthcare, Gaming

TECHNICAL SKILLS

• Android	10 years
• Node.js	2 years
• Django	2 years
• React	2 years
• iOS	1 years
• Flutter	6 months

SOFT SKILLS

Cross-functional Team Leadership, Strategic Networking, Talent Acquisition & Development, Conflict Management, Manager of Managers, Product Management, Delegation, Business Development, Problem Solving

PROJECT DETAILS

• Radical — January-2023 - October-2023

Project Description: A conference management tool in the Health tech space, Radical felicitated creation of conference portals in minutes. With the core infrastructure prebuilt, you could spin up a web and mobile application for a specific conference with very little effort. The tool let you set the agenda, schedule 1:1 appointments with the speakers and also allowed chats with webinars.
Responsibilities: Oversaw the complete development process with setting up the base architecture and code reviews. Led the development of a multi-tenant system to keep data secure across different conference instances and entities. Collaborated with the product and business teams to align on a single vision and build a product best suited for target user needs.
Technologies: Django, ReactJS
Industry: Healthcare

• Preseasoned August-2022 - November-2023

Project Description: Preseasoned is a social app created for content creators. This has been designed to help sports content creators, such as influencers or brands, connect with fans or followers to help monetise their respective audiences. It also features a fantasy gaming component where users could earn millions.

Responsibilities: Led the product, engineering and business teams to build a seamless experience for users. Interfaced with 3rd party services to enable features like Realtime chat, KYC verification, payments etc within the application. Made sure the team followed all coding best practices for a readable and scalable codebase.

Technologies: Android, iOS, React Native, Django

Industry: Gaming

EMPLOYMENT HISTORY

• CTO

Description: Boosted productivity by building a team dedicated to automating day to day company activities, saving 100s of man-hours a week. Accelerated product delivery through building a library of plug-n-play modules and foundational starter kits leading to 25% faster deliveries on average. Directed engineering finances, blending in-house talent and freelance expertise to enhance project development efficiency and budgetary health. Drove developer utilisation up by 20%, designing multiple training programs and focusing on rapid up-skilling to shape a team trained on our entire tech stack.

• Co Founder June-2013 - October-2019

Bowstring Studio

Description: Fostered partnerships with the likes of Cisco, Uber, Swiggy & Zenoti while driving the delivery of top-tier digital applications and scalable systems. Worked with the team to build over 20 pixel perfect native experiences on both Android and iOS. Oversaw the migration effort from Laravel to NodeJS leading to 15% increase in performance and speed. Optimized tech interviewing protocols, synergising with a panel of domain experts and harnessing partnerships with 1,000+ agencies, freelancers, and developers bringing down recruitment costs to a fraction of the budget.

EDUCATION

• Bachelors degree in Electronics and Computers from Newcastle University 2009 - 2011

• Bachelors degree in Computer Science from Jaypee Institute of Information technology 2008 - 2009

LANGUAGES

• English - native
