• AWS	2 years

PROJECT DETAILS

• INDUSTRIAL AUDIT February-2021 - November-2021

Project Description: Industrial Audit focuses on continually finding ways to help our clients stay on time and on budget by standardizing and optimizing their field data collection, project reporting, and integration with enterprise systems.
Responsibilities: Designed and implemented the frontend architecture using React, providing an intuitive user interface. Developed RESTful APIs for seamless communication between the frontend and backend. Implemented user authentication and authorization mechanisms to ensure secure transactions. Integrated third-party payment gateways for smooth and secure online transactions. Conducted code reviews and mentored junior developers to maintain code quality.
Technologies: React, Redux, Node.js, MongoDB, Express.js, JWT, Docker
Industry: Finance

• PYPESTREAM February-2023 - August-2023

Project Description: Pypestream self-service automation sets the standard for digital self-service that is actually enjoyable, not to mention extremely cost effective
Responsibilities: Designed and implemented a responsive and dynamic frontend using React and Redux. Developed backend APIs to handle task creation, assignment, and real-time updates using WebSocket. Integrated user authentication and authorization features for secure task management. Collaborated with UI/UX designers to ensure an intuitive and user-friendly experience. Implemented automated testing to validate application functionality.
Technologies: React, Redux, Node.js, MongoDB, Express.js, WebSocket, JWT
Industry: Automation

EMPLOYMENT HISTORY

• Software Engineer
