I Have around 4+ years of experience in Software Development. Having Knowledge in Ethereum, Hyperledger, Solidity, Web3JS Having Knowledge in React, NodeJS, and Bootstrap. Having experience in reviewing the deliverables and completing the projects in time. Capable of testing web applications with scripts and fixing bugs. Quick learner, sincere, hard worker, self-motivated and always ready for challenges.

INDUSTRIES: web3

TECHNICAL SKILLS

• Node.js	4 years
• React	4 years
• PostgreSQL	4 years
• cryptographic protocols	4 years
• consensus algorithms	4 years
• Solana ecosystem	4 years

PROJECT DETAILS

• Desights

Project Description: Desights is a web3 platform to crowdsource solutions to the toughest AI & ML challenges. whoever wants to find a solution for a challenge, he can use this application (just like stackoverflow and kaggle). If a user wants to create a challenge, he has to spend some tokens (polygon matic) to publish a challenge. And many of the people can participate to resolve that challenge and which challenge is accepted by the creator, then the user can get the reward amount. Currently it supports polygon matic token only. We used IPFS to upload the user and challenge details.
Responsibilities: Having Knowledge in Ethereum, Hyperledger, Solidity, Web3JS Having Knowledge in React, NodeJS, and Bootstrap. Having experience in reviewing the deliverables and completing the projects in time. Capable of testing web applications with scripts and fixing bugs. Quick learner, sincere, hard worker, self-motivated and always ready for challenges.
Technologies: cryptographic protocols, consensus algorithms, Solana ecosystem
Industry: web3

• Treecoin

Project Description: TreeCoin is a sustainable project that benefits both the environment and investors who value the planet‘s precious resources. This project benefits tree coins to owners who plant and grow trees in their land. Coins will be delivered based on their tree volume and the number of trees they plant, land size and also the tree species. We can add co-owners also and they will receive a percentage of profits generated.
Responsibilities: Having Knowledge in Ethereum, Hyperledger, Solidity, Web3JS Having Knowledge in React, NodeJS, and Bootstrap. Having experience in reviewing the deliverables and completing the projects in time. Capable of testing web applications with scripts and fixing bugs. Quick learner, sincere, hard worker, self-motivated and always ready for challenges.
Technologies: cryptographic protocols, consensus algorithms, Solana ecosystem, Node.js, React.js, PostgreSQL
Industry: web3

EMPLOYMENT HISTORY

• Blockchain Developer

Description: Having Knowledge in Ethereum, Hyperledger, Solidity, Web3JS Having Knowledge in React, NodeJS, and Bootstrap. Having experience in reviewing the deliverables and completing the projects in time. Capable of testing web applications with scripts and fixing bugs. Quick learner, sincere, hard worker, self-motivated and always ready for challenges.

EDUCATION

• Bachelors degree in CS from Tamilnadu Government 2017 - 2019

LANGUAGES

• English - advanced
