• Python	4 years
• SQL	4 years
• Tableau	4 years
• Pandas	4 years
• PowerBI	4 years
• excel	4 years

PROJECT DETAILS

• Introduction to Data Studio — September-2022 - December-2022

Project Description: Designed to focus on the functionality data platform developers use the most, Azure Data Studio offers additional experiences available as optional extensions. It's built for data professionals who use SQL Server and Azure databases on-premises or in multicloud environments. Explore the new extensions for migrating Oracle to Azure SQL

Responsibilities: Data Consumers. Data consumers use data to make data-driven decisions and actively have ... Business Analysts. Business Analysts are responsible for tying data insights to actionable Data Analysts. Similar to Business Analysts, Data Analysts are responsible for analyzing data ... Data Scientist. Data Scientists investigate, extract, and report meaningful insights

Technologies: Python

Industry: Software and Platforms

• Analyzing and Visualizing Data with Microsoft Power BI — May-2022 - August-2022

Project Description: Connect to your data source: Power BI supports various data sources, including Excel, SQL Server, and cloud-based platforms like Azure and Google Analytics. Transform and clean your data: Once your data is connected, you can use Power BI’s built-in data transformation and cleaning tools to shape your data into the format you need for your visualization.

Responsibilities: Create a report: Use Power BI’s drag-and-drop interface to create a report that visualizes your data in a way that makes sense for your business. Share your report: Once you’ve created your report, you can share it with others in your organization by publishing it to the Power BI service.

Technologies: Microsoft Power BI

Industry: Chemicals

EMPLOYMENT HISTORY

• Business Analyst

Description: Optimized client’s business operations through data analysis and process improvement recommendations, boosting operational efficiency by 10% and elevating customer satisfaction by 18%. ● Developed insightful dashboards and visualizations utilizing business KPIs, driving 18% faster datadriven decision-making and enhancing performance tracking. ● Spearheaded documentation, including Business Requirement Documents (BRD) and Functional Requirement Documents (FRD), streamlining 11 projects, and improving stakeholder communication. ● Applied analytical strategies to minimize gas loss, optimize resource allocation and achieving a 10% cost reduction while maintaining a 95% uptime in gas delivery. ● Conducted industry benchmarking and SWOT analysis, integrating best practices that bolstered operational efficiency of laying gas pipes by 8% and contributed to a higher Net Promoter Score (NPS). ● Led and successfully delivered 12 database projects with high customer satisfaction, while actively engaging with clients through inquiries, briefings, and presentations, solidifying client relationships. ● Prepared Quality Inspection format for quality checks of PNG equipment using Excel

EDUCATION

• Bachelors degree in (Mechanical Engineering from Bangalore 2015 - 2019

LANGUAGES

• English - intermediate
