As a seasoned Backend Developer with over 8+ years of experience, I specialize in crafting scalable solutions and driving excellence in every project. Proficient in languages such as Python, GoLang, Node.JS. I've contributed to the development of innovative features, including an interactive language-learning AI. Committed to continuous learning, mentorship, and leveraging technology to create impactful solutions.

**INDUSTRIES:** Education

## TECHNICAL SKILLS

| | |
|---|---|
| • Python | 8 years |
| • Django | 7 years |
| • MySQL | 6 years |
| • AWS | 3 years |
| • golang | 2 years |
| • GCP | 2 years |
| • Node.js | 1 years & 6 months |

## SOFT SKILLS

Teamwork, Time management, Problem-solving

## PROJECT DETAILS

• Student Helper — April-2023 - September-2023

Project Description: This project paved the way for an innovative feature wherein users could directly converse with an AI bot. This bot, designed to simulate human-like interactions, provided users with an opportunity to practice their English. During these conversations, the AI bot would actively correct and guide users on their English usage, offering them a unique and interactive learning experience. The initiative seamlessly blended the realms of technology and education, greatly enhancing user engagement and learning outcomes.

Responsibilities: Developed and implemented an innovative language learning feature, enabling users to engage in interactive conversations with an AI bot. Facilitated real-time English practice, with the bot offering corrections and guidance. Successfully integrated technology and education, significantly improving user engagement and learning outcomes.

Technologies: Python/Django/ChatGPT

Industry: Education

• Practice Partner Calling — August-2021 - March-2023

Project Description: This feature enables you to connect with another user via voice calling.

Responsibilities: I conceptualized and developed this feature called "Practice Partner" in our app. This innovative functionality allowed users to connect and converse with each other over the network, fostering an environment where they could collaboratively practice and enhance their English speaking skills. To ensure users had more meaningful and prolonged interactions, I designed a sophisticated recommendation engine that paired individuals based on compatibility.

Technologies: Python/Django/GOLang/Redis/RabbitMQ/Celery

Industry: Education
