PROJECT DETAILS

• Learning Management System

Project Description: LMS, or Learning Management System, plays a crucial role in the field of education technology (edtech). An LMS is a software application or platform that helps educators and institutions manage and deliver educational content, monitor student progress, and facilitate communication and collaboration in an online learning environment.
Responsibilities: User Authentication: Implemented robust login and sign-up functionality, enhancing platform security and user experience. Performance Optimization: Employed optimization techniques to ensure smooth and efficient system performance, resulting in seamless navigation and reduced loading times. Interactive Dashboards: Created dynamic dashboards that provided users with insightful data visualizations, enhancing their ability to track progress and make informed decisions. Responsive Design: Ensured a consistent user experience across devices by incorporating responsive design principles, making the system accessible and user-friendly on various screen sizes.
Technologies: React , Javascript , HTML , CSS, Redux
Industry: Education

• Website

Project Description: create a robust and user-friendly e-commerce platform that will revolutionise the way our customers engage with our products. The goal of this project is to establish an online marketplace that provides a seamless shopping experience, encourages customer loyalty, and facilitates efficient backend management.
Responsibilities: Optimize the website for search engines. Conduct keyword research and implement on-page SEO strategies. Monitor website traffic and performance using analytics tools. Collaborate with content creators to ensure SEO-friendly content.Integrate front-end components with server-side logic. Implement security measures and data protection.
Technologies: Next Js ,React , Javascript , HTML , CSS, Redux
Industry: Ecommerce
